Jsc Question Patterns 2014:

Leading the 21st-Century Academic Library Bradford Lee Eden, 2015-03-02 Libraries of all types have undergone significant developments in the last few decades. The rate of change in the academic library a presence for decades now has been increasing in the first decade of this century. It is no exaggeration to claim that it is undergoing a top to bottom redefinition. Cataloging and reference remain central to its new role and the circulation of books is still high though declining. Among the changes is the architecture of the library when new libraries replace old or where renovation is occurring the role of technology at every stage and in every library application the management of serials selection shelving and budgeting and in a gradual but irrevocable move to digital forms altered allocation of resources including larger portions of the budget diverted to preservation not only of aging books a theme in the latter part of the last century but of digital files cultural historical personal. In brief the academic library is dramatically different today than it was only ten years ago. And with it the profession of the academic librarian is also undergoing significant changes. Managing digital resources in all its forms from telecommunications to storage and access devices is central to its new roles. Creating curating and preserving digital information is also key to the new librarianship. And what about services to its clients. Here also we see dramatic change particularly but not exclusively with guiding library users in the effective use of networked knowledge. Information literacy is a key term and skill in using the new tools of digital literacy reading and writing searching and extracting and the new technologies that drive social networking the Iphone Ipad and Ipod and its many imitators. We can't expect the redefined academic library to assume its final shape any time soon if ever but the transformation is well underway. This series Creating the 21st Century Academic Library will explore this topic from a number of different perspectives. Volume 1 Visionary Leadership and Futures will begin the discussion by examining some of the new roles and directions academic libraries are taking.

Gender and the Judiciary in Africa Gretchen Bauer, Josephine Dawuni, 2015-10-30 Between 2000 and 2015 women ascended to the top of judiciaries across Africa most notably as chief justices of supreme courts in common law countries like Ghana Nigeria Sierra Leone Gambia Malawi Lesotho and Zambia but also as presidents of constitutional courts in civil law countries such as Benin Burundi Gabon Niger and Senegal. Most of these appointments was a first in terms of the gender of the chief justice. At the same time women are being appointed in record numbers as magistrates judges and justices across the continent. While women's increasing numbers and roles in African executives and legislatures have been addressed in a burgeoning scholarly literature very little work has focused on women in judiciaries. This book addresses the important issue of the increasing numbers and varied roles of women judges and justices as judiciaries evolve across the continent. Scholars of law gender politics and African politics provide overviews of recent developments in gender and the judiciary in nine African countries that represent north east southern and west Africa as well as a range of colonial experiences postcolonial trajectories and legal systems including mixes of common civil customary or sharia law. In the

process each chapter seeks to address the following questions What has been the historical experience of the judicial system in a given country from before colonialism until the present What is the current court structure and where are the women judges justices magistrates and other women located What are the selection or appointment processes for joining the bench and in what ways may these help or hinder women to gain access to the courts as judges and justices Once they become judges do women on the bench promote the rights of women through their judicial powers What are the challenges and obstacles facing women judges and justices in Africa Timely and relevant in this era in which governmental accountability and transparency are essential to the consolidation of democracy in Africa and when women are accessing significant leadership positions across the continent this book considers the substantive and symbolic representation of women s interests by women judges and the wider implications of their presence for changing institutional norms and advancing the rule of law and human rights
