Scientific and Technical Aerospace Reports ,1978 *The Dynamics of Opportunity in America* Irwin Kirsch, Henry
 Braun, 2016-01-22 Across the country our children are beginning life from very different starting points Some have
 aspirations and believe they can be achieved For too many others aspirations are tempered if not dashed by the sobering
 realities of everyday life These different starting points place children on distinctly different trajectories of growth and
 development ultimately leading to vastly different adult outcomes How did we get to a place where circumstances of birth
 have become so determinative And what must we do within communities and across our country to better equalize
 opportunity for more Americans both young and old The editors of this volume contend that if as a nation we do nothing then
 we will continue to drift apart placing an unsustainable strain on the nation s social fabric and the character of its democracy
 Consequently understanding the dynamics governing the distribution and transmission of opportunity and transforming this
 understanding into policies and programs is critical for not only the life outcomes of individual Americans and their children
 but also the country as a whole The goal of Educational Testing Service s Opportunity in America initiative is to explore these
 powerful dynamics and to describe and convey them in a way that advances the national conversation about why we must
 take action and how best to do so This volume contains 14 chapters including an epilogue written by leaders from a range of
 fields including education economics demography and political science Collectively they not only illuminate key aspects of
 the problem but also offer suggestions of what policies programs and changes in practices could begin to reverse the trends
