Literature Education in the Asia-Pacific Chin Ee Loh, Suzanne S.

Choo, Catherine Beavis, 2018-03-29 The continual rise of English as a global lingua franca has meant that English literature both as a discipline and as a tool in ESL and EFL classrooms is being used in varied ways outside the inner circle of English. This edited collection provides an overview of English literature education in the Asia Pacific in global times bringing to international attention a rich understanding of the trends, issues and challenges specific to nations within the Asia Pacific region. Comprising contributions from Australia, China, Hong Kong, India, Indonesia, Malaysia, Philippines, Singapore and Vietnam, the collection addresses the diversity of learners in different national cultural and teaching contexts. In doing so, it provides insights into historical and current trends in literature education, foregrounds specific issues and challenges in policymaking and implementation, presents practical matters concerning text selection, use of literature in the language classroom, innovative practices in literature education and raises pressing and important questions about the nature, purpose and importance of literature education in global times. *School Mathematics Curricula* Catherine P. Vistro-Yu, Tin Lam Toh, 2019-04-26 This book sheds light on school mathematics curricula in Asian countries including their design and the recent reforms that have been initiated. By discussing and analyzing various problematic aspects of curriculum development and implementation in a number of East and South Asian countries and offering insights into these countries' unique approaches to supplementing school mathematics curricula, it contributes to shaping effective policies for implementation, assessment and monitoring of curricula. The book covers a wide range of issues: curriculum design, localization of curricula, directions of curricular reforms, mathematics textbooks, assessment within the curriculum and teachers' professional development, which are of interest to a wide international audience. *Serving Library Users from Asia* John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g. disabled, Latino seniors, etc.), few books on serving library users of Asian heritage have been written. Thus, the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters, each on a specific Asian country's cultures of East, Southeast and South Asia, with a wealth of resources for understanding, interacting with, outreaching to and serving library users of each culture. Resources include cultural guides, both print and online, language helps with sample library vocabulary, Asian booksellers, nationwide cultural groups, professional literature and more. Resources and suggestions are given for all three types of libraries: public, school and academic, making this book valuable for all librarians. The demographics of each Asian culture, numbers and distribution, plus history of immigration and international student enrollment is also featured. As a bonus, each chapter spotlights a US public school and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems and more of public school and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described. Literacy levels, reading
