The National and Technology and Food (NNT&F)

Capacities: Operational 2b Food standards – Effective communication

Learning Outcomes

As digital products, information technologies (based on business and social sciences) has revolutionized all kinds of businesses. Study and work require usage of information technology tools, physical and virtual food settings. Physical tools involve various software to capture all food data for their design, weight, nutrient, density, cost, texture, and flavoring. Digital technologies use identity as measure of ingredients composition for food trace as per the changes the foodline of different food sources. However, they involve sophisticated sensory testing for food source. Digital technologies might involve:

As the technology grows, we will see different food security measures and standards that we produce the composition of food. The requirements will be provided:

- a) Requirement 2.1 – Informational or paper content using the business
- a) Requirement 2.2 – Informational or paper content using a database
- a) Requirement 2.3 – Informational or paper content using digital technology

Steven Ackley,T. Newell Decker,Charles

J. Limb, 2018-03-29 *An Essential Guide to Hearing and Balance Disorders* consolidates the most significant clinical aspects of hearing and balance disorders ranging from cause and diagnosis to treatment and cure. Experts in various subspecialties of this extensive topic introduce readers to the most sophisticated and state-of-the-art methods of diagnosis and treatment. Each chapter expands on a specific topic area along the continuum of how medical personnel diagnose hearing and balance disorders to how surgical implantation of the cochlea and rehabilitation can remedy various conditions. In concise format, the book begins with a case history and follows with comprehensive descriptions of current knowledge regarding fundamental causes of hearing loss and balance disorders as well as a thorough examination of objective assessment. The latter half of the volume presents specialized treatment and rehabilitative options for various disorders. The chapters in this part cover special topics and conclude with pertinent case studies. Unique areas of discussion in a text of this kind include genetics of deafness, pediatric hearing loss, and hearing loss later in life. *Business Essentials in Audiology: Private Practice Professional Issues* such as ethics, methods of practice, and conflicts of interest. As its title implies, this book is critically important for all students and professionals in hearing balance-related disciplines including audiology, otolaryngology, general medicine, and rehabilitation-oriented allied health care occupations. Plant pests and diseases cause an annual average of 40% global food failure addressed by FAO and more than 100 billion dollars in loss of forest and grass resources. Scientific prevention and control of pests and diseases in agriculture, forestry, and grass is important to ensure food security, ecological, and environmental safety, etc. At present, the accuracy of individual identification of agricultural, forestry, and grass pests and diseases is low, making it difficult to achieve accurate outpost warning, occurrence, environment monitoring, and multiple pest and disease type differentiation, resulting in the inability to achieve early detection and control of pests and diseases. With the rapid development of remote sensing, big data, and artificial intelligence technologies, information technology has been widely used in agriculture, forestry, and grass pest and disease precision monitoring and forecasting. Digital precision monitoring and forecasting of major pests and diseases have become a major development trend in the agriculture, forestry, and grass industry. This research topic aims to collect the latest advances related to digital accurate monitoring and forecasting of pests and diseases in agriculture, forestry, and grass. We welcome research on monitoring of vegetation parameters, digital image processing of pests and diseases, and monitoring and forecasting of pests

and diseases such as inversion of vegetation physical and chemical parameters vegetation growth monitoring identification of individual species of pests and diseases quantitative extraction of pests and diseases early warning of pest and disease outposts and rapid monitoring and evaluation of large areas of pests and diseases The research topic will provide key technologies and solutions for digital monitoring and early warning of pests and diseases and the established multidisciplinary cross fertilization and collaborative innovation mechanism is of great significance for promoting the construction of plant protection systems and the development of pest and disease monitoring and forecasting industry
