

## Membrane Structure

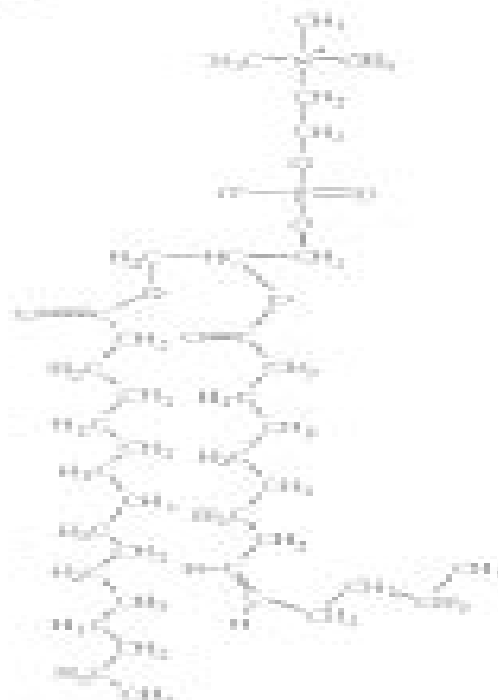

What molecules make up a membrane?

### Why?

Imagine your bedroom without closets, drawers, shelves, bags or boxes—just a room with a bed. Where would your stuff be? Would you be able to find the things you needed? How efficiently could you get ready for school in the morning? Would all of your school books be together when you sit down to study? The compartments you use in your room—the closets, drawers, etc.—help you organize items by category so that all the items you need to get dressed are in one place. All the items you need for studying are in another place. This **compartmentalization** improves efficiency. Cells also need organization to improve efficiency. The compartmentalization of cells is achieved by dividing up areas in the cell with membranes. A plasma membrane compartmentalizes internal structures while the cell membrane acts as a boundary between the cell and the external environment.

Lipidation is most study groups meet and do the two POGIL activities presented here. You will not be learning in the main in the activity, we will discuss the membrane class. The information presented here is all aligned for the rest. You will not in the other part group in the upcoming questions. That class is also included from the end of class. Therefore, Oct 24.
