Konisky, 2015-04-10 A systematic evaluation of the implementation of the federal government s environmental justice policies In the 1970s and 1980s the U S Congress passed a series of laws that were milestones in environmental protection including the Clean Air Act and the Clean Water Act But by the 1990s it was clear that environmental benefits were not evenly distributed and that poor and minority communities bore disproportionate environmental burdens The Clinton administration put these concerns on the environmental policy agenda most notably with a 1994 executive order that called on federal agencies to consider environmental justice issues whenever appropriate This volume offers the first systematic empirically based evaluation of the effectiveness of the federal government s environmental justice policies The contributors consider three overlapping aspects of environmental justice distributive justice or the equitable distribution of environmental burdens and benefits procedural justice or the fairness of the decision making process itself and corrective justice or the fairness of punishment and compensation Focusing on the central role of the Environmental Protection Agency they discuss such topics as facility permitting rulemaking participatory processes bias in enforcement and the role of the courts in redressing environmental injustices Taken together the contributions suggest that despite recent environmental justice initiatives from the Obama administration the federal government has largely failed to deliver on its promises of environmental justice Contributors Dorothy M Daley Eileen Gauna Elizabeth Gross David M Konisky Douglas S Noonan Tony G Reames Christopher Reenock Ronald J Shadbegian Paul Stretesky Ann Wolverton **Rebuilding resilient and sustainable agriculture in Somalia (Full report)** Food and Agriculture Organization of the United Nations, 2018-11-02 This report documents the pressures on Somalia s livestock and crop subsectors over the years but notes that there is a

cause for optimism thanks to the country's resilience and resources. These include a variety of agroecological zones and vast tracts of arable land and areas suitable for livestock production which in turn can support markets, export trade and overall growth. Handbook on Hybrid Organisations David Billis, Colin Rochester, 2020-02-28 Hybrid Organisations that integrate competing organisational principles have become a preferred means of tackling the complexity of today's societal problems. One familiar set of examples are organisations that combine significant features from market, public and third sector organisations. Many different groundbreaking approaches to hybridity are contained in this Handbook which brings together a collection of empirical studies from an international body of scholars. The chapters analyse and theorise the position of hybrid organisations and have important implications for theory, practice and policy in a context of proliferating hybrid forms of organisation. Immigrant Student Achievement and Education Policy Louis Volante, Don Klinger, Ozge Bilgili, 2018-03-21 This book examines immigrant student achievement and education policy across a range of Western nations. It is divided into 3 sections. Part 1 introduces the topic of immigrant student achievement and the performance disadvantage that is consistently reported across a range of international jurisdictions. Part 2 then presents national profiles from scholars in ten countries: England, Germany, Italy, Sweden, Finland, Netherlands, Republic of Ireland, Canada, Australia and New Zealand. These educational jurisdictions were selected because they represent a range of Western nations engaged in large scale reform efforts geared towards enhancing their immigrant students' achievement. Each of the national profiles provides a brief overview of the evolution of the cultural composition of their respective school-aged student population, explains the trajectory of achievement results in non-immigrant and immigrant student groups in relation to both national and international large scale assessment measures and discusses the effectiveness of policy responses that have been adopted to close the achievement gap between non-immigrant and immigrant student populations. It also examines the relationships between education policies and immigrant student achievement and discusses how education policies have evolved across various cultural contexts. In conclusion, Part 3 analyzes cross-cultural approaches designed to address the performance disadvantage of immigrant students and proposes future areas of inquiry stemming from the national profiles. The book offers insights into a diverse cross-section of nations and policy approaches to addressing the performance disadvantage.

Mapping Power Navroz K. Dubash, 2018-08-22 Electricity is critical to enabling India's economic growth and providing a better future for its citizens. In spite of several decades of reform, the Indian electricity sector is unable to provide high quality and affordable electricity for all and grapples with the challenge of poor financial and operational performance. To understand why *Mapping Power* provides the most comprehensive analysis of the political economy of electricity in India's states. With chapters on fifteen states by scholars of state politics and electricity, this volume maps the political and economic forces that constrain and shape decisions in electricity distribution. Contrary to conventional wisdom, it concludes that

attempts to depoliticize the sector are misplaced and could worsen outcomes. Instead, it suggests that a historically grounded political economy analysis helps understand the past and devise reforms to simultaneously improve sectoral outcomes and generate political rewards. These arguments have implications for the challenges facing India's electricity future, including providing electricity to all, implementing government reform schemes, and successfully managing the rise of renewable energy.
