**NASA Technical Memorandum** ,1994      Unclear Physics Målfrid Braut-Hegghammer,2016-08 Many authoritarian leaders want nuclear weapons but few manage to acquire them Autocrats seeking nuclear weapons fail in different ways and to varying degrees Iraq almost managed it Libya did not come close In Unclear Physics M lfrid Braut Hegghammer compares the two failed nuclear weapons programs showing that state capacity played a crucial role in the trajectory and outcomes of both projects Braut Hegghammer draws on a rich set of new primary sources collected during years of research in archives fieldwork across the Middle East and interviews with scientists and decision makers from both states She gained access to documents and individuals that no other researcher has been able to consult Her book tells the story of the Iraqi and Libyan programs from their origins in the late 1950s and 1960s until their dismantling This book reveals contemporary perspectives from scientists and regime officials on the opportunities and challenges facing each project Many of the findings challenge the conventional wisdom about clandestine weapons programs in closed authoritarian states and their prospects of success or failure Braut Hegghammer suggests that scholars and analysts ought to pay closer attention to how state capacity affects nuclear weapons programs in other authoritarian regimes both in terms of questioning the actual control these leaders have over their nuclear weapons programs and the capability of their scientists to solve complex technical challenges      5 Steps to a 5 AP Physics B, 2014 Edition Greg Jacobs,Joshua Schulman,2013-07-10 Get ready for your AP exam with this straightforward and easy to follow study guide updated for all the latest exam changes 5 Steps to a 5 AP Physics B features an effective 5 step plan to guide your preparation program and help you build the skills knowledge and test taking confidence you need to succeed This fully revised edition covers the latest course syllabus and provides model tests that reflect the latest version of the exam Inside you will find 5 Step Plan to a Perfect 5 1 Set Up Your Study Program 2 Determine Your Test Readiness 3 Develop Strategies for Success 4 Develop the Knowledge You Need to Score High 5 Build Your Test Taking Confidence 2 complete practice AP Physics B exams 3 separate plans to fit your study style Review material updated and geared to the most recent tests Savvy information on how tests are constructed scored and used      **World Congress on Medical Physics and Biomedical Engineering, June 7-12, 2015, Toronto, Canada** David A. Jaffray,2015-07-13 This book presents the proceedings of the IUPESM World Biomedical Engineering and Medical Physics a tri annual high level policy meeting dedicated exclusively to furthering the role of biomedical engineering and medical physics in medicine The book offers papers about emerging issues related to the development and sustainability of the role and impact of medical physicists and biomedical engineers in medicine and healthcare It provides a unique and important forum to secure a coordinated multileveled global response to the need demand and importance of creating and supporting strong academic and clinical teams of biomedical engineers and medical physicists for the benefit of human health      The impact of spending cuts on science and scientific research Great Britain: Parliament: House of Commons: Science and Technology

Committee,2010-03-25 The pressure to be seen to be making cuts across the public sector is threatening to undermine both the Government's good record on investment in science and the economic recovery Whilst the contribution of a strong domestic science base is widely acknowledged methodological problems with quantifying its precise value to the economy mean that it is in danger of losing out in Whitehall negotiations Scientists are under increasing pressure to demonstrate the impact of their work and there is concern that areas without immediate technology applications are being undervalued The Committee believes the Government faced a strategic choice invest in areas with the greatest potential to influence and improve other areas of spending or make cuts of little significance now but that will have a devastating effect upon British science and the economy in the years to come      Scientific Authorship Mario Biagioli,Peter Galison,2014-01-27 Since the

seventeenth century our ideas of scientific authorship have expanded and changed dramatically In this ambitious volume of new work Mario Biagioli and Peter Galison have brought together historians of science literary historians and historians of the book Together they track the changing nature and identity of the author in science both historically and conceptually from the emergence of scientific academies in the age of Galileo to concerns with large scale multiauthorship and intellectual property rights in the age of cloning labs and pharmaceutical giants How for example do we decide whether a chemical compound is discovered or invented What does it mean to patent genetic material Documenting the emergence of authorship in the late medieval period authorship's limits and its fragmentation Scientific Authorship offers a collective history of a complex relationship      Dynamics and Predictability of Large-Scale, High-Impact Weather and Climate Events Jianping

Li,Richard Swinbank,Richard Grotjahn,Hans Volkert,2016-03-24 Based largely on an International Commission on Dynamical Meteorology ICDM workshop this timely volume written by leading researchers in the field covers a range of important research issues related to high impact weather and extreme climate events Dynamical linkages between these extremes and various atmospheric and ocean phenomena are examined including Atlantic Multidecadal North Atlantic and Madden Julian Oscillations Annular Modes tropical cyclones and Asian monsoons This book also examines the predictability of high impact weather and extreme climate events on multiple time scales Highlighting recent research and new advances in the field this book enhances understanding of dynamical and physical processes associated with these events to help managers and policy makers make informed decisions to manage risk and prevent or mitigate disasters It also provides guidance on future research directions in atmospheric science meteorology climate science and weather forecasting for experts and young scientists      Qualitative Research Sharon M. Ravitch,Nicole Mittenfelner Carl,2019-12-20 The second edition of Qualitative

Research focuses on cultivating and bridging theoretical methodological and conceptual aspects to provide insight into their interactions in qualitative research This comprehensive text helps students understand the central concepts topics and skills necessary to engage in rigorous valid and respectful qualitative research Authors Sharon M Ravitch and Nicole Mittenfelner Carl have written this text with student researchers in mind balancing communicating the foundations and processes of

qualitative research with clarity and simplicity while also capturing its complexity and layers Whether students are new to qualitative research or not this book will help students develop and deepen their understanding of an approach to research that seeks designs for and engages criticality in research The new edition of this book includes a more prominently placed and expanded discussion of research ethics as crucial to students inquiry more information on reflexivity in data collection and individual methods for qualitative data collection a more in depth chapter on coding and other types of qualitative data analysis and more thorough resource sections including connections to the extensive appendices so students can further their qualitative research journey Included with this title The password protected Instructor Resource Site formally known as SAGE Edge offers access to all text specific resources including a test bank and editable chapter specific PowerPoint slides

**CMS Pixel Detector Upgrade and Top Quark Pole Mass Determination** Simon Spannagel, 2017-08-01 This thesis addresses two different topics both vital for implementing modern high energy physics experiments detector development and data analysis Providing a concise introduction to both the standard model of particle physics and the basic principles of semiconductor tracking detectors it presents the first measurement of the top quark pole mass from the differential cross section of  $t\bar{t}J$  events in the dileptonic  $t\bar{t}$  decay channel The first part focuses on the development and characterization of silicon pixel detectors To account for the expected increase in luminosity of the Large Hadron Collider LHC the pixel detector of the compact muon solenoid CMS experiment is replaced by an upgraded detector with new front end electronics It presents comprehensive test beam studies conducted to verify the design and quantify the performance of the new front end in terms of tracking efficiency and spatial resolution Furthermore it proposes a new cluster interpolation method which utilizes the third central moment of the cluster charge distribution to improve the position resolution The second part of the thesis introduces an alternative measurement of the top quark mass from the normalized differential production cross sections of dileptonic top quark pair events with an additional jet The energy measurement is 8TeV Using theoretical predictions at next to leading order in perturbative Quantum Chromodynamics QCD the top quark pole mass is determined using a template fit method

**Political Animals** Rick Shenkman, 2016-01-05 Can a football game affect the outcome of an election What about shark attacks Or a drought In a rational world the answer of course would be no But as bestselling historian Rick Shenkman explains in Political Animals our world is anything but rational Drawing on science politics and history Shenkman explores the hidden forces behind our often illogical choices Political Animals challenges us to go beyond the headlines which often focus on what politicians do or say they ll do and to concentrate instead on what s really important what shapes our response Shenkman argues that contrary to

what we tell ourselves it's our instincts rather than arguments appealing to reason that usually prevail Pop culture tells us we can trust our instincts but science is proving that when it comes to politics our Stone Age brain often malfunctions misfires and leads us astray Fortunately we can learn to make our instincts work in our favor Shenkman takes readers on a whirlwind tour of laboratories where scientists are exploring how sea slugs remember chimpanzees practice deception and patients whose brains have been split in two tell stories The scientists findings give us new ways of understanding our history and ourselves and prove we don't have to be prisoners of our evolutionary past In this engaging illuminating and often riotous chronicle of our political culture Shenkman probes the depths of the human mind to explore how we can become more political and less animal
