Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in

Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe. Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development. In addition, a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing. This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy. It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis. Although both approaches have the capacity to deal with asymmetries and uneven development, the heterogeneity in Europe has been an often largely neglected dimension of analysis. However, this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration. Hence, this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives. This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE, European political economy and European politics.

Class in the New Millennium Will Atkinson, 2017-02-17. *Class in the New Millennium* paints a fresh and comprehensive picture of social class in Britain today. Anchored in a broad repertoire of methods and pursuing a distinctive theoretical agenda, it not only painstakingly maps the structure transformation and effects of the UK's key fault lines but goes behind closed doors to see how they play out in everyday family life. Throughout the book, Atkinson throws new light on a diverse array of themes including the continued effects of deindustrialisation, educational expansion, feminisation of the workforce and surging employment insecurity, the persistence of lifestyle cleavages despite cultural and technological change, the growth of political disengagement, the transformation of the Labour Party and the rise of nationalism, the entwinement of class with space, place and physical movement and the way in which class interacts with intimate relations to shape not just the way we decorate our walls or talk over the dining table but the very reproduction of the class structure itself. This innovative title will appeal to scholars as well as advanced undergraduate and postgraduate students interested in the fields of sociology, politics and political science, cultural studies, cultural geography, social policy and social work.

Taken for a Ride Matteo Rizzo, 2017. How does public transport work in an African city under neoliberalism? Who owns what in it? Who has the power to influence its shape and changes in it over time? What does it mean to be a precarious and informal worker in the private minibuses that provide public transport in Dar es Salaam? These are the main questions that inform this in-depth case study of Dar es Salaam's public transport system over more than forty years. The growth of cities and informal economies are two central manifestations of globalization in the developing world. *Taken for a Ride* addresses both, drawing on long-term fieldwork in Dar es Salaam, Tanzania and charting its public transport system's journey from public to private provision. This new addition to the Critical

Frontiers of Theory Research and Practice in International Development Studies series investigates this shift alongside the increasing deregulation of the sector and the resulting chaotic modality of public transport. It reviews state attempts to regain control over public transport and documents how informal wage relations prevailed in the sector. The changing political attitude of workers towards employers and the state is investigated from an initial incapacity to respond to exploitation to the political organisation and unionisation which won workers concessions on labour rights. A longitudinal study of workers throws light on patterns of occupational mobility in the sector. The book ends with an analysis of the political and economic interests that shaped the introduction of Bus Rapid Transit in Dar es Salaam and local resistance to it. Taken for a Ride is an interdisciplinary political economy of public transport exposing the limitations of market fundamentalist and postcolonial approaches to the study of economic informality, the urban experience in developing countries and their failure to locate the agency of the urban poor within their economic and political structures. It is both a contribution to and a call for the contextualised study of neoliberalism.

Barak Kushner,2024-03-15 In The Geography of Injustice Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan s empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan s imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption The Geography of Injustice offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history **State against Civil Society** Cameron Ross,2017-10-02 Over the period December 2011 July 2013 a tidal wave of mass protests swept through the Russian capital and engulfed scores of cities and regions These demonstrations came as a great shock to the Russian political establishment After decades of passive acceptance of the status quo it appeared that civil society was at last awakening The protests came in the wake of the Arab Spring revolts which toppled authoritarian dictators

in Tunisia Egypt and Libya However by the end of 2013 the number of mass protests in Russia and their size had declined precipitously President Putin on returning to office in 2012 had quickly regained the upper hand over the protestors This book examines the reasons for the rise and fall of the mass protests in the Russian Federation Internationally renowned experts in the field of Russian politics from Russia and the UK provide important new insights into the nature of the mass opposition movement the non systemic opposition its strengths and its weaknesses A key novel aspect of the study is its focus on the national and regional dimensions of the protest movement and its class and ethnic dimensions This book was published as a special issue of Europe Asia Studies Manipulating Authoritarian Citizenship Samantha A.

Vortherms,2024-10-15 The redistribution of political and economic rights is inherently unequal in autocratic societies Autocrats routinely divide their populations into included and excluded groups creating particularistic citizenship through granting some groups access to rights and redistribution while restricting or denying access to others This book asks why would a government with powerful tools of exclusion expand access to socioeconomic citizenship rights And when autocratic systems expand redistribution whom do they choose to include In *Manipulating Authoritarian Citizenship* Samantha A Vortherms examines the crucial case of China where internal citizenship regimes control who can and cannot become a local citizen through the household registration system hukou and uncovers how autocrats use such institutions to create particularistic membership in citizenship Vortherms shows how local governments explicitly manipulate local citizenship membership not only to ensure political security and stability but also crucially to advance economic development Vortherms demonstrates how autocrats use differentiated citizenship to control degrees of access to rights and thus fulfill the authoritarian bargain and balance security and economic incentives This book expands our understanding of individual state relations in both autocratic contexts and across a variety of regime types *The Tumultuous Politics of Scale* Donald M.

Nonini,Ida Susser,2020-01-23 Contemporary politics this book contends depend upon the turbulent struggles and strategies around scale Confl icts over scale can be seen as opaque class struggles Political projects whether from the ground up or representing corporate or state interests continually contest the scale at which authority is vested This volume looks at the way global corporations redefi ne the scale of power and how working class and other movements build alliances and cross scales to develop political blocs What injustices are perpetrated or more hopefully redressed in this process The book consisting of contributions from anthropologists geographers and cultural studies scholars explores theoretical issues around contested temporal and spatial scales and around variations in scale from the body to the global Part I focuses on bodies in motion entangled in battles over new boundaries and political coalitions and the ways in which migrants and refugees are disrupted by intersecting time scales Part II on the nation state addresses the shifting responsibilities assigned by law at diff erent historical moments and the impact of global energy trade on national austerity policies Part III on rescaling sovereignty discusses the misleading media discourse on Brexit and reconstructs the class bases of the move to the Right in Eastern

Europe that threaten the EU Part IV on the histories of changing scales of movements revisits historical debates on uneven and combined development and sets out the transnational labor movements of the eighteenth and nineteenth century Atlantic which prefigure contemporary struggles of labor in a world which is still one of uneven and combined capitalist development Finally Part V considers ways in which some social movements are constrained by scale while others reshape parties and traverse nations in their efforts to build class alliances and political blocs A Global Idea Mayssoun Sukarieh, 2023-08-15

A Global Idea outlines how youth as shown by the Arab Spring uprisings and subsequent state responses became a prominent social and political category during the first two decades of the twenty first century in the Middle East Drawing on ethnographic fieldwork interview data and textual analysis Mayssoun Sukarieh explains that the spread of youth as an important category is linked to the operation of a global youth development complex a diverse transnational network of state private sector civil society and international development aid organizations that worked through key urban areas such as Washington DC Amman and Dubai In its analysis of the arrival extension and embedding of the youth development complex in the Middle East during this period A Global Idea addresses a broader question that is of global and not just regional concern How are certain ideas that are central to the working and reproduction of global capitalism able to travel the world so that they are found virtually everywhere *Chasing Archipelagic Dreams* David R. Saunders, 2024-12-15

In *Chasing Archipelagic Dreams* David R Saunders demonstrates that the withdrawal of the British imperial state from Sabah did not result in the decolonization of the territory From the late 1940s to the 1960s international anti colonialism interacted with regional competition over Sabah to result in a paradoxical increase of British power and influence on the ground Meanwhile ethnic social and political heterogeneity in Sabah contributed to fragmentation and disunity undermining the development of a local anti colonial movement Instead a class of influential local elites seized power as competing attempts by the Philippines Indonesia and Malaya to incorporate the territory into their respective archipelagic spheres grew in strength Due to these local and international rivalries Saunders argues Sabah's eventual merger with the Federation of Malaysia in 1963 prompted an extension of colonial style rule resource extraction the suppression of local autonomy and the imposition of an externally configured national identity *Chasing Archipelagic Dreams* underscores the significance of regional rivalries in the South China Sea and highlights the fate of subaltern communities bisected by post colonial borders *Countering Online Propaganda and Extremism* Corneliu Bjola, James Pamment, 2018-12-07

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

Putin's Labor Dilemma Stephen Crowley, 2021-07-15 In Putin's Labor Dilemma Stephen Crowley investigates how the fear of labor protest has inhibited substantial economic transformation in Russia Putin boasts he has the backing of workers in the country's industrial heartland but as economic growth slows in Russia reviving the economy will require restructuring the country's industrial landscape At the same time doing so threatens to generate protest and instability from a key regime constituency However continuing to prop up Russia's Soviet era workplaces writes Crowley could lead to declining wages and economic stagnation threatening protest and instability Crowley explores the dynamics of a Russian labor market that generally avoids

mass unemployment the potentially explosive role of Russia's monotowns conflicts generated by massive downsizing in Russia's Detroit Tol'yatti and the rapid politicization of the truck drivers movement Labor protests currently show little sign of threatening Putin's hold on power but the manner in which they are being conducted point to substantial chronic problems that will be difficult to resolve Putin's Labor Dilemma demonstrates that the Russian economy must either find new sources of economic growth or face stagnation Either scenario market reforms or economic stagnation raises the possibility even probability of destabilizing social unrest

An Endogenous Theory of Property Rights Peter Ho, 2018-10-15 From a neo liberal neo classical paradigm secure formal and private property rights are crucial to fostering sustained development Institutions that fail to respond to shifting socio economic opportunities are thus forced to make new arrangements The enigma is posed by developments on the ground Why would the removal of authoritarian institutions during the Arab Spring or Iraq War not increase market efficiency but rather cause the reverse while China and India despite persisting insecure informal and common institutions featured sustained growth This collection posits that understanding these paradoxes requires a refocusing from form to function detached from normative assumptions about institutional appearance In so doing three things are accomplished First starting from case studies on land it is ascertained that the argument can be meaningfully extended to labour capital and beyond Second the argument validates the Credibility Thesis that is once institutions persist they fulfil a function Third the collection studies development broadly construed by including the modes of production and beyond the rural and urban the developed and developing This is why it reviews property rights from China and India to Turkey Mexico and Malaysia covering issues such as customary rights and privatization mining and pastoralism dam building and irrigation but also state owned banks trade unions and notaries This book was originally published as a special issue of The Journal of Peasant Studies
