The Problem of Social Inequality Scott G. McNall, 2015-12-07 Within and among nations rising levels of social inequality threaten our collective future Currently upwards of 80% of people s life chances are determined by factors over which they have absolutely no control Social inequality threatens the democratic project because it destroys the trust on which governments depend and it gives rise to corrupt political and economic institutions How can we get out of the traps we have created for ourselves We need to reboot capitalism Drawing on diverse examples from a range of countries McNall explains the social economic and ecological traps we have set for ourselves and develops a set of rules of resilience that are necessary conditions for the creation and maintenance of democratic societies and a set of rules essential for creating a sustainable future

The Politics of Immigration Tom K. Wong, 2017 Immigration has been deeply woven into the fabric of American nation building since the founding of the Republic Indeed immigrants have played an integral role in American

history but they are also intricately tied to America's present and will feature prominently in America's future. Immigration can shape a nation. Consequently, immigration policy can maintain, replenish, and even reshape it. Immigration policy debates are thus seldom just about who to let in and how many, as a nation's immigration policies can define its identity. This is what helps breathe fire into the politics of immigration. Against this backdrop, political parties promote their own narratives about what the immigration policies of a nation of immigrants should be while undermining the contrasting narratives of political opponents. Racial and ethnic groups mobilize for political inclusion as immigration increases their numbers but are often confronted by the counteractive mobilization of nativist groups. Legislators calibrate their positions on immigration by weighing traditional electoral concerns against a new demographic normal that is reshaping the American electorate. At stake are not just what our immigration policies will be but also what America can become. What are the determinants of immigration policymaking in the United States? The Politics of Immigration focuses the analytical lens on the electoral incentives that legislators in Congress have to support or oppose immigration policy reforms at the federal level. In contrast to previous arguments, Tom K. Wong argues that contemporary immigration politics in the United States can be characterized by three underlying features: the entrenchment of partisan divides among legislators on the issue of immigration; the political implications of the demographic changes that are reshaping the American electorate; and how these changes are creating new opportunities to define what it means to be an American in a period of unprecedented national origins, racial, and ethnic and cultural diversity.

Reassessing the Social Studies Curriculum Wayne Journell, 2016-05-03. The terrorist attacks of September 11, 2001, dramatically changed many aspects of American society, and the ramifications of that horrific event are still impacting the domestic and foreign policies of the United States. Yet fifteen years after 9/11, an event that was predicted to change the scope of public education in the United States, we find that the social studies curriculum remains virtually the same as before the attacks. For a discipline charged with developing informed citizens prepared to enter a global economy, such curricular stagnation makes little sense. This book, which contains chapters from many leading scholars within the field of social studies education, both assesses the ways in which the social studies curriculum has failed to live up to the promises of progressive citizenship education made in the wake of the attacks and offers practical advice for teachers who wish to encourage a critical understanding of the post-9/11 global society in which their students live.

Campbell, 2017-10-15 City of Forests City of Farms is a history of recent urban

forestry and agriculture policy and programs in New York City Centered on the 2007 initiative PlaNYC this account tracks the development of policies that increased sustainability efforts in the city and dedicated more than 400 million dollars to trees via the MillionTreesNYC campaign Lindsay K Campbell uses PlaNYC to consider how and why nature is constructed in New York City Campbell regards sustainability planning as a process that unfolds through the strategic interplay of actors the deployment of different narrative frames and the mobilizing and manipulation of the physical environment which affects nonhuman animals and plants as well as the city's residents Campbell zeroes in on a core omission in PlaNYC's original conception and funding Despite NYC having a long tradition of community gardening particularly since the fiscal crisis of the 1970s the plan contained no mention of community gardens or urban farms Campbell charts the change of course that resulted from burgeoning public interest in urban agriculture and local food systems She shows how civic groups and elected officials crafted a series of visions and plans for local food systems that informed the 2011 update to PlaNYC City of Forests City of Farms is a valuable tool that allows us to understand and disentangle the political decisions popular narratives and physical practices that shape city greening in New York City and elsewhere Urban Geopolitics Jonathan Rokem, Camillo Boano, 2017-08-21 In the last decade a new wave of urban research has emerged putting comparative perspectives back on the urban studies agenda However this research is frequently based on similar case studies on a few selected cities in America and Europe and all too often focus on the abstract city level with marginal attention given to particular local contexts Moving away from loosely defined urban theories and contexts this book argues it is time to start learning from and compare across different contested cities It questions the long standing Euro centric academic knowledge production that is prevalent in urban studies and planning research This book brings together a diverse range of international case studies from Latin America South and South East Asia Eastern Europe Africa and the Middle East to offer an in depth understanding of the worldwide contested nature of cities in a wide range of local contexts It suggests an urban ontology that moves beyond the urban West and North as well as adding a comparative relational understanding of the contested nature that Southern cities are developing This timely contribution is essential reading for those working in the fields of human geography urban studies planning politics area studies and sociology **An Oral History of the Palestinian Nakba** Doctor Nahla Abdo, Nur Masalha, 2018-05-15 In 2018 Palestinians mark the 70th anniversary of the Nakba when over 750 000 people were uprooted and forced to flee their homes in the early days of the Israeli Palestinian conflict Even today the bitterness and trauma of the Nakba remains raw and it has become the pivotal event both in the shaping of Palestinian identity and in galvanising the resistance to occupation Unearthing an unparalleled body of rich oral testimony An Oral History of the Palestinian Nakba tells the story of this epochal event through the voices of the Palestinians who lived it uncovering remarkable new insights both into Palestinian experiences of the Nakba and into the wider dynamics of the ongoing conflict Drawing together Palestinian accounts from 1948 with those of the present day the book confronts the idea of the Nakba as an event consigned

to the past instead revealing it to be an ongoing process aimed at the erasure of Palestinian memory and history In the process each unique and wide ranging contribution leads the way for new directions in Palestinian scholarship Agency in Transnational Memory Politics Jenny Wüstenberg,Aline Sierp,2020-07-01 The dynamics of transnational memory play a central role in modern politics from postsocialist efforts at transitional justice to the global legacies of colonialism Yet the relatively young subfield of transnational memory studies remains underdeveloped and fractured across numerous disciplines even as nascent boundary crossing theories on topics such as multi vocal traveling or entangled remembrance suggest new ways of negotiating difficult political questions This volume brings together theoretical and practical considerations to provide transnational memory scholars with an interdisciplinary investigation into agency the who and the how of cross border commemoration that motivates activists and fascinates observers Borderless Worlds for Whom? Anssi Paasi,Eeva-Kaisa Prokkola,Jarkko Saarinen,Kaj Zimmerbauer,2018-10-25 The optimism heralded by the end of the Cold War and the idea of an emerging borderless world was soon shadowed by conflicts wars terrorism and new border walls Migrants asylum seekers and refugees have simultaneously become key political figures Border and mobility studies are now two sides of the same coin The chapters of this volume reflect the changing relations between borders bordering practices and mobilities They provide both theoretical insights and contextual knowledge on how borders bordering practices and ethical issues come together in mobilities The chapters scrutinize how bounded territorial and open networked relational spaces manifest in various contexts The first section Borders in a borderless world raises theoretical questions The second Politics of inclusion and exclusion looks at bordering practices in the context of migration The third section Contested mobilities and encounters focuses on tourism which has been an accepted form of mobility but which has recently become an object of critique because of overtourism Section four Borders security politics examines bordering practices and security in the EU and beyond highlighting how the migration border politics nexus has become a national and supra national political challenge The chapters of this interdisciplinary volume contribute both conceptually and empirically to understanding contemporary bordering practices and mobilities It is essential reading for geographers political scientists sociologists and international relations scholars interested in the contemporary meanings of borders and mobilities
