*Middle-Class African American English* Tracey L. Weldon, 2021-02-04 From its historical development to its current context this is the first full length overview of middle class African American English

On the Cross Road of Polity, Political Elites and Mobilization Barbara Wejnert, Paolo Parigi, 2016-12-21 This volume discusses the various interrelations that exist within and between social and political phenomena

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to

resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people Excluded Richard D Kahlenberg,2023-07-11 An indictment of America s housing policy that reveals the social engineering underlying our segregation by economic class the social and political fallout that result and what we can do about it The last acceptable form of prejudice in America is based on class and executed through state sponsored economic discrimination which is hard to see because it is much more subtle than raw racism While the American meritocracy officially denounces prejudice based on race and gender it has spawned a new form of bias against those with less education and income Millions of working class Americans have their opportunity blocked by exclusionary snob zoning These government policies make housing unaffordable frustrate the goals of the civil rights movement and lock in inequality in our urban and suburban landscapes Through moving accounts of families excluded from economic and social opportunity as they are hemmed in through new redlining that limits the type of housing that can be built Richard Kahlenberg vividly illustrates why America has a housing crisis He also illustrates why economic segregation matters since where you live affects access to transportation employment opportunities decent health care and good schools He shows that housing choice has been socially engineered to the benefit of the affluent and that astonishingly the most restrictive zoning is found in politically liberal cities where racial views are more progressive Despite this there is hope Kahlenberg tells the inspiring stories of growing number of local and national movements working to tear down the walls that inflicts so much damage on the lives of millions of Americans **Structural Racism** Stephen Menendian,2025-06-30 This book explains how racial inequality in the United States is produced and perpetuated and what should be done about it It develops the elusive concept of structural racism presenting a precise definition that is clear and comprehensible and illustrates how it operates methodically and rigorously Many other books are long on problems and short on solutions whereas this book develops the key principles that must ground a structural reform agenda and then presents a broad ranging set of interventions organized around ten themes that will reduce racial disparities while expanding opportunity for all Unlike most books on race which focus on a particular issue or sector this

book is comprehensive in its scope encompassing the vital systems that shape racial inequality in contemporary American society from education and public schools to income and wealth disparities to housing and health care to policing and the criminal justice system As such this book is the ideal text for readers seeking to learn more about structural racial inequality in society how it came to be that way and what we should do about it while deepening our understanding and challenging many misguided or simplistic prevailing notions In a time of backlash to racial justice and growing doubts about racial equity initiatives this book is a timely and necessary entry A must read for advocates students policymakers and researchers alike

Bailey,2019-02-07 The sixth volume in the Global Research on Teaching and Learning English series offers up to date research on the rapidly changing field of language assessment The book features original research with chapters reporting on a variety of international education settings from a range of diverse perspectives Covering a broad range of key topics including scoring processes test development and student and teacher perspectives contributors offer a comprehensive overview of the landscape of language assessment and discuss the consequences and impact for learners teachers learning programs and society Focusing on the assessment of language proficiency this volume provides an original compendium of cutting edge research that will benefit TESOL and TEFL students language assessment scholars and language teachers      *Bicycle Justice and Urban Transformation* Aaron Golub,Melody L. Hoffmann,Adonia E. Lugo,Gerardo F. Sandoval,2016-07-15 As bicycle commuting grows in the United States the profile of

the white middle class cyclist has emerged This stereotype evolves just as investments in cycling play an increasingly important role in neighborhood transformations However despite stereotypes the cycling public is actually quite diverse with the greatest share falling into the lowest income categories Bicycle Justice and Urban Transformation demonstrates that for those with privilege bicycling can be liberatory a lifestyle choice whereas for those surviving at the margins cycling is not a choice but an often oppressive necessity Ignoring these invisible cyclists skews bicycle improvements towards those with choices This book argues that it is vital to contextualize bicycling within a broader social justice framework if investments are to serve all street users equitably Bicycle justice is an inclusionary social movement based on furthering material equity and the recognition that qualitative differences matter This book illustrates equitable bicycle advocacy policy and planning In synthesizing the projects of critical cultural studies transportation justice and planning the book reveals the relevance of social justice to public and community driven investments in cycling This book will interest professionals advocates academics and students in the fields of transportation planning urban planning community development urban geography sociology and policy
