Royal Commission on Historical Manuscripts, 1903      *Engineer's Year-book of Formulae, Rules, Tables, Data & Memoranda*, 1999      Defending English Ground Steven G. Ellis, 2015-05-07

A key duty of the Renaissance monarchy was the defence of its subjects For the English monarchy the rule and defence from enemies beyond the long landed frontiers in Ireland and the English far north proved an intractable problem It was not however a duty which was accorded a high priority by successive Yorkist and early Tudor kings nor is it an aspect of state formation which has attracted much attention from modern historians This study assesses traditional arrangements for defending English ground the impact of the frontier on border society and the way in which the topography and patterns of settlement in border regions shaped the character of the march and border itself Defending English Ground focuses on two English shires Meath and Northumberland in a period during which the ruling magnates of these shires who had hitherto supervised border rule and defence were mostly unavailable to the crown Unwilling to foot the cost of large garrisons and extended fortifications successive kings increasingly shifted the costs of defence onto the local population prompting the border gentry and minor peers to organize themselves through county communities for the rule and defence of the region This strategy was generally successful in Ireland where the military threat presented by the wild Irish was not so formidable but in the English far north Tudor reform

centralized control and the burden of defence against the Scots soon led to the decay of the borders

**Memorandum** Waterways Experiment Station (U.S.),1993      Ireland's English Pale, 1470-1550 Steven G. Ellis,2021

Challenges the argument that the English Pale was contracting during the early Tudor period A key argument of this book is that the English Pale the four counties around Dublin under English control was expanding during the early Tudor period not contracting as other historians have argued The author shows how the new system whereby the four obedient shires were protected by new fortifications and a newly constituted English style militia which replaced the former system of extended marches was highly effective making unnecessary money and troops from England and enabling the Dublin government to be self financing The book provides full details of this new system It also demonstrates how direct rule by an English army and governor which replaced the system in the years after 1534 was much more costly and led on in turn to the policy of surrender and regrant under which Irish chiefs became subject to English law The book highlights how this policy made the English Pale s frontiers redundant but how ideologically ideas of English civility nevertheless survived and the wild Atlantic way remained beyond the Pale
