The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

Spine Surgery Bernhard Meyer, Michael Rauschmann, 2019-03-04 This book covers the content of European postgraduate spine surgery courses using a case based approach It describes a stepwise solution to a real world clinical problem and compares this with the best available evidence It then provides suggestions on how to bridge the gap if there is one between standard of care and evidence based medicine Spine Surgery A Case Based Approach is aimed at postgraduate students of spine surgery both trainee neurosurgeons and trainee orthopedic surgeons and is also of interest to medical students

Markets and People World Bank, 2020-02-10 Romania's income per capita has increased from 26 percent of the EU 28 average in 2000 to 63

percent in 2017 but this economic success rests on the wobbly foundations of unfavorable demographics weak human capital and ineffective institutions Going forward stronger competition and better human capital are critical to increasing the economy's growth potential Romanian manufacturing firms are exposed to domestic and international competition ensuring the flow of resources and market shares to more efficient players This has not been the case for services where anticompetitive regulations and direct state control often limit efficiency gains Romanian state owned enterprises do not compete on an equal footing with private sector firms distorting market outcomes and hampering the efficient allocation of resources Removal of these restrictions would have a significant positive impact on GDP growth Competitively neutral policies are needed to ensure that all enterprises public or private domestic or foreign face the same set of rules Romania's human capital accumulation proxied by the World Bank's Human Capital Index HCI is the lowest in the European Union and varies widely across counties Disparities in education outcomes remain relevant across and within regions of Romania Learning gaps in primary and secondary education persist These can be seen clearly between urban and rural areas across regions and across social groups requiring changes both at the systems level and at the learning center level In the labor market the automation of production processes has started driving demand for higher levels of cognitive skills while jobs involving the routine application of procedural knowledge are shrinking in number A paradigm shift would require reforms in primary and secondary schooling in addition to more targeted actions to establish an effective skills development system to bolster human capital
