Chinese Research Perspectives on Educational Development, Volume 4 Dongping Yang, 2019-09-24 This collection of articles selected from Blue Book of Chinese Education 2015 published in Chinese reviews the condition of China's education development in 2014. The wide range of topics covered in this volume fall under two major themes: reform and equity. Chapters on reform focus on the college entrance exam Gaokao, secondary vocational education, senior high school education provincially and locally funded colleges, private universities, and junior high school admissions policies. Chapters in the second half of the book provide readers with an in-depth account of efforts made to improve equity in special and early childhood education, study abroad preparation classes, and rural education. The appendix includes a report of budgetary expenditure on education and chronology of major events.

Saving Congress from Itself James L. Buckley, 2014-12-09 Saving Congress from Itself proposes a single reform: eliminate all federal grants in aid to state and local governments. This action would reduce federal spending by over 600 billion a year and have a profound effect on how we govern ourselves. The proliferation of federal grants in aid programs is of recent vintage: only about 100 such grants existed before Lyndon Johnson took office, and now they number more than 1,100. Eliminating grants to the states will result in enormous savings in federal and state administrative costs, free states to set their own priorities, and improve the design and implementation of programs now subsidized by Washington by eliminating federal regulations that attend the grants. In short, it will free states and their subdivisions to resume full responsibility for all activities that fall within their competence, such as education, welfare, and highway construction and maintenance. And because members of Congress spend major portions of their time creating grants and allocating funds assigned to them, think earmarks: eliminating grants will enable Congress to devote its time to responsibilities that are uniquely national in character.

Assessing Writing to Support Learning Sandra Murphy, Peggy O'Neill, 2022-11-08 In this book, authors Murphy and O'Neill propose a new way forward, moving away from high-stakes test-based writing assessment and the curriculum it generates and toward an approach to assessment that centers on student learning and success. Reviewing the landscape of writing assessment and existing research-based theories on writing, the authors demonstrate how a test-based approach to accountability and current practices have undermined effective teaching and learning of writing. This book bridges the gap between real-world writing that takes place in schools, college, and careers and the writing that students are asked to do in standardized writing assessments to offer a new ecological approach to writing assessment. Murphy and O'Neill's new way forward turns accountability inside out to help teachers understand the role of formative assessments and assessment as inquiry. It also brings the outside in by bridging the gap between authentic writing and writing assessment. Through these two strands, readers learn how assessment systems can be restructured to become better aligned with contemporary understandings of writing and with best practices in teaching. With examples of assessments from elementary school through college, chapters include guidance on designing assessments to address multiple kinds of writing, integrate reading with writing, and incorporate digital technology and multimodality. Emphasizing

the central role that teachers play in systemic reform the authors offer sample assessments developed with intensive teacher involvement that support learning and provide information for the evaluation of programs and schools This book is an essential resource for graduate students instructors scholars and policymakers in writing assessment composition and English education **Who's who Among Students in American Universities and Colleges** Henry Pettus Randall,1973
