Schramm, 2010 About the Author Jeff Schramm is an associate professor of history at Missouri University of Science and Technology Book Jacket **The Battle for Transportation Supremacy** Lawrence Walsh, 2014-07-03 Nowhere in all of North America is the competition for passenger travel more intense than in the 450 mile long Northeast Corridor In The Battle for Transportation Supremacy author Lawrence Walsh examines the struggles of transportation companies during

the past 170 years as they aimed to be the leader and considers how that leadership is tough to attain and tougher still to hold on to This study discusses how the southern half of this corridor New York City to Washington DC is dominated by passenger rail travel although the commercial airlines buses and even rental planes and cars are contenders The northern half has until very recently been the domain of commercial airlines and buses While rail passenger travel was once the dominant player as were overnight steamships both slipped away in importance The overnight steamships disappeared completely and the rail companies almost did as well Walsh then details how rail travel surged back to the point where faster and more frequent electrified trains are once again in vogue and enjoying a major renaissance He examines the environmental fiscal and technology factors that caused this and looks at today s titans of transportation Including a host of illustrations The Battle for Transportation Supremacy shows how history is in part a prologue to the future Will a major success on the corridor s northern half be the model to further higher speed rail in the United States *Trains* ,1962

Model Railroader ,1963 **Realistic Model Railroad Design** Tony Koester,2004 Design a freelanded or prototype based model railroad by selecting a time period modeling geography creating a roster using graphics and following paint schemes
