Mitchell Reyes,2021-04-15 As discrete fields of inquiry rhetoric and mathematics have long been considered antithetical to each other That is if mathematics explains or describes the phenomena it studies with certainty persuasion is not needed This volume calls into question the view that mathematics is free of rhetoric Through nine studies of the intersections between these two disciplines Arguing with Numbers shows that mathematics is in fact deeply rhetorical Using rhetoric as a lens to analyze mathematically based arguments in public policy political and economic theory and even literature the essays in this volume reveal how mathematics influences the values and beliefs with which we assess the world and make decisions and how our worldviews influence the kinds of mathematical instruments we construct and accept In addition contributors examine how concepts of rhetoric such as analogy and visuality have been employed in mathematical and scientific reasoning including in the theorems of mathematical physicists and the geometrical diagramming of natural scientists Challenging academic orthodoxy these scholars reject a math equals truth reduction in favor of a more constructivist theory of mathematics as dynamic evolving and powerfully persuasive By bringing these disparate lines of inquiry into conversation with one another Arguing with Numbers provides inspiration to students established scholars and anyone inside or outside rhetorical studies who might be interested in exploring the intersections between the two disciplines In addition to the editors the contributors to this volume are Catherine Chaput Crystal Broch Colombini Nathan Crick Michael Dreher Jeanne Fahnestock Andrew C Jones Joseph Little and Edward Schiappa      *Ricardo's Dream* Nat Dyer,2024-11-26 From the workings of financial markets to our response to the ecological crisis economic theory shapes the world But where do these ideas come from Ricardo s Dream tells the fascinating story of David Ricardo Adam Smith s only real rival as the founder of economics The wealthiest stock trader of his day Ricardo introduced the study of abstract models to economics He also developed the theory of trade that underpinned globalization and hides behind its mathematical facade a history of power empire and slavery Brimming with fresh ideas and stories Ricardo s Dream shows how too many economists from Ricardo s day to our own have turned away from observing the real world and led us astray      *Preparation Master UPTET Paper 1 - Previous Year Solved Papers (2011 - 2022) - Uttar Pradesh Teacher Eligibility Test Class 1 to 5 with Free Access to Online Tests* EduGorilla Prep Experts,      Digital Technologies and Applications Saad Motahhir,Badre Bossoufi,2021-06-26 This book gathers selected research papers presented at the First International Conference on Digital Technologies and Applications ICDTA 21 held at Sidi Mohamed Ben Abdellah University Fez Morocco on 29 30 January 2021 highlighting the latest innovations in digital technologies as artificial intelligence Internet of things embedded systems network technology information processing and their applications in several areas such as hybrid vehicles renewable energy robotic and COVID 19 The respective papers encourage and inspire researchers industry professionals and policymakers to put these methods into practice      The Prime Number Conspiracy Thomas Lin,2018-11-20 The Pulitzer Prize winning magazine s stories of

mathematical explorations show that inspiration strikes haphazardly revealing surprising solutions and exciting discoveries with a foreword by James Gleick These stories from Quanta Magazine map the routes of mathematical exploration showing readers how cutting edge research is done while illuminating the productive tension between conjecture and proof theory and intuition The stories show that as James Gleick puts it in the foreword inspiration strikes willy nilly One researcher thinks of quantum chaotic systems at a bus stop another suddenly realizes a path to proving a theorem of number theory while in a friend s backyard a statistician has a bathroom sink epiphany and discovers the key to solving the Gaussian correlation inequality Readers of The Prime Number Conspiracy says Quanta editor in chief Thomas Lin are headed on breathtaking intellectual journeys to the bleeding edge of discovery strapped to the narrative rocket of humanity s never ending pursuit of knowledge Winner of the 2022 Pulitzer Prize for Explanatory Reporting Quanta is the only popular publication that offers in depth coverage of the latest breakthroughs in understanding our mathematical universe It communicates mathematics by taking it seriously wrestling with difficult concepts and clearly explaining them in a way that speaks to our innate curiosity about our world and ourselves Readers of this volume will learn that prime numbers have decided preferences about the final digits of the primes that immediately follow them the conspiracy of the title consider whether math is the universal language of nature allowing for a unified theory of randomness discover surprising solutions including a pentagon tiling proof that solves a century old math problem ponder the limits of computation measure infinity and explore the eternal question Is mathematics good for you Contributors Ariel Bleicher Robbert Dijkgraaf Kevin Hartnett Erica Klarreich Thomas Lin John Pavlus Siobhan Roberts Natalie Wolchover Copublished with Quanta Magazine

for Education Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2012-05-11 The Department for Education is distributing 56.4 billion in 2011/12 to schools, local authorities and other public bodies for the delivery of education and children's services in England. The Department has set out how it intends to provide Parliament with assurance about the regularity, propriety and value for money in an Accountability System Statement, the Statement of which the Committee has now seen three drafts. Responsibility for value for money is shared by the Department with schools, academy trusts, local authorities, the Young People's Learning Agency and the Department for Communities and Local Government. However, the Statement does not yet clearly describe the specific responsibilities of each body, how these will interact or how the Department will assess value for money across the entire education system. The Department relies on local authorities and the YPLA to exercise financial oversight over local authority maintained schools and academies respectively. However, oversight by some local authorities is currently weak and could worsen as many authorities reduce the resources they devote to overseeing their schools. There are also concerns about whether the YPLA will have the right skills, systems and capacity to oversee the rapidly increasing numbers of academies expected in coming years. More consistent requirements for data and data returns must be applied to all schools so that academic and financial performance can be benchmarked and all schools can be held accountable. The Department needs to enforce these requirements more stringently, particularly given previous problems with lack of compliance.
