The Pursuit of Happiness in a More Perfect Union Robert G. Bill, 2016-11-07 The conflict between conservatives and liberals over public economic policy appears to have become a permanent feature of the American political landscape Conservatives seek economic solutions with the market as virtually the sole organizing economic principle invoking individualism inspired by the Declaration of Independence's right to the pursuit of happiness Liberals look to an important economic role for a federal government established by the Constitution to promote the general welfare In addition to the disagreement among the political class there is also no agreement among economists with no model reliably predicting the economic crises of recent decades Under these circumstances the author believes individualism and the concern for the common good may only be reconciled through policies which promote equality of opportunity or as Abraham Lincoln expressed it equal privileges in the race of life with all its desirable human aspirations The reconciliation of individualism and the common good is developed through reviews of the meaning of liberty happiness and their economic implications The historical performance of the American economy is described in the context of the evolution of American federal government from one of limited economic scope supporting laissez faire capitalism to the current mixed government The more expansive role of government is described in terms of taxation policy and spending including concerns over the national debt and its significance With this background the general reader is invited to follow the authors path to a policy of equality of opportunity with specific proposals for an end to poverty assistance to children assistance to postsecondary education and training and commitments to social and medical security A specific taxation policy is proposed to fund these programs while maintaining a prudent and manageable national debt Associated with these proposals are reforms to make the federal government more representative of the people

Babones, 2015-04-08 The election of the next US president is upon us and with established politicians such as Hillary Clinton and Jeb Bush poised to be key players the campaigns seem destined to be as contentious as ugly and as seemingly removed from the reality of American lives as ever In *Sixteen for '16* Salvatore Babones takes the politics out of policy bringing the debate back to the issues that matter in a new unified agenda for the 2016 elections Decades of destructive social and economic policies have devastated poor working and middle class American communities It is now clear that harsh austerity does not bring prosperity that the wealthy have no intention of seeing their wealth trickle down and that each generation is no longer better off than the ones that came before But what to do In this progressive election field manual Babones outlines sixteen core principles to combat these entrenched problems America needs jobs infrastructure a rededication to public education universal healthcare higher taxes on higher incomes a more secure Social Security an end to the rule of the bankers stronger unions a living minimum wage better working conditions an end to the prison state secure reproductive rights voter equality a more moral foreign policy a more humane refugee policy and action on global warming A clear concise manifesto supported by hard data *Sixteen for '16* makes a compelling case for each of these ambitious positions And as ambitious as Babones's suggested policies are they represent a beginning not an end The progressive movement is on the march in America and this accessible book charts a realistic path toward a destination all can believe in a better tomorrow
