Ontario Boys Christopher J. Greig, 2014-02-04 Ontario Boys explores the preoccupation with boyhood in Ontario during the immediate postwar period 1945-1960 It argues that a traditional version of boyhood was being rejuvenated in response to a population fraught with uncertainty and suffering from insecurity instability and gender anxiety brought on by depression era and wartime disruptions in marital familial and labour relations as well as mass migration rapid postwar economic changes the emergence of the Cold War and the looming threat of atomic annihilation In this sociopolitical and cultural context concerned adults began to cast the fate of the postwar world onto children in particular boys In the decade and a half immediately following World War II the version of boyhood that became the ideal was one that stressed selflessness togetherness honesty fearlessness frank determination and emotional toughness It was thought that investing boys with this version of masculinity was essential if they were to grow into the kind of citizens capable of governing protecting and defending the nation and of course maintaining and regulating the social order Drawing on a wide variety of sources Ontario Boys demonstrates that although girls were expected and encouraged to internalize a special kind of citizenship as caregivers and educators of children and nurturers of men the gendered content and language employed

indicated that active public citizenship and democracy was intended for boys An appropriate boyhood in the postwar period became if nothing else a metaphor for the survival of the nation *A Curriculum for Plastic Surgery* Edward

Josephus Robinson,1920 **Teachers, Gender and the Feminisation Debate** Marie-Pierre Moreau,2019-01-15 Teachers

Gender and the Feminisation Debate critically engages with the claim that teaching is a feminised profession and offers a comprehensive and authoritative analysis of the way gender and power play out in the lives of male and female teachers. Informed by social constructivist feminist theories of work and education, the book adopts a relational and intersectional approach to gender. Drawing on a range of primary and secondary sources including national and international datasets, policy and research texts, and an original corpus of interviews conducted by the author in England and France, the book provides a timely assessment of a view of teaching as feminised. It explores the various discourses and debates about the feminisation of teaching which circulate in media and policy circles in a range of local, national and international contexts and questions some of the claims underpinning these discourses. It also analyses the experiences of men and women who teach, looking at the way gender and power impact on their careers and private lives in the context of the feminisation debate.

Teachers, Gender and the Feminisation Debate offers a research-informed and comprehensive account of gender issues in the teaching profession and will be of great interest to academics, researchers and postgraduate students in the fields of education, sociology and gender studies. International Perspectives on Gender and Higher Education Christine Fontanini, K.M. Joshi, Saeed Paivandi, 2020-11-26. Despite improved access to higher education for women, the distribution of women and men varies considerably between fields of study. The chapters in this edited collection explore the participation status of women in higher education across the varying socio-economic and sociological backgrounds observed in different countries and regions.

Smart Girls Shauna Pomerantz, Rebecca Raby, 2017-01-03. Are girls taking over the world? It would appear so based on magazine covers, news headlines and popular books touting girls' academic success. Girls are said to outperform boys in high school exams, university entrance and graduation rates and professional certification. As a result, many in Western society assume that girls no longer need support. But in spite of the messages of post-feminism and neoliberal individualism that tell girls they can have it all, the reality is far more complicated. *Smart Girls* investigates how academically successful girls deal with stress, the 'supergirl' drive for perfection, race and class issues, and the sexism that is still present in schools. Describing girls' varied everyday experiences, including negotiations of traditional gender norms, Shauna Pomerantz and Rebecca Raby show how teachers, administrators, parents and media commentators can help smart girls thrive while working toward straight As and a bright future.

Men Teaching Children 3-11 Elizabeth Burn, Simon Pratt-Adams, 2015-11-19. *Men Teaching Children 3-11* provides a comprehensive exploration of work experiences of men who teach young children. The authors draw on their own research as well as international studies to provide realistic strategies to help to remove barriers in order to develop a more gender-balanced teacher workforce. Burn and Pratt-Adams, former primary school teachers who have both experienced these unfair gender practices, also trace the historical roots of the gender barriers that have now become embedded within the occupational culture. Throughout *Men Teaching Children 3-11*, the authors argue that primary school teachers should be judged by their teaching talents rather than by the application of

biased gender stereotypes and that male and female teachers need to work together to remove these stereotypes from the occupation
