G12 Geography Possible Questions 2014:

Rock Coast Geomorphology D.M. Kennedy, W.J. Stephenson, L.A. Naylor, 2014-08-20 Rocky landforms dominate large portions of the world's coast. Cliffs and shore platforms form spectacular landscapes yet when compared to other landforms they are relatively unstudied with many contemporary controversies dating back to the mid nineteenth century. The past decade has seen a reinvigoration of research driven by advances in technology that now enable precise measurements of erosion to the micron scale and quantification of wave energy onto and through cliff edifices to be made as well as being able to directly date rock surfaces. In order to integrate this diverse range of research this volume's regional approach first integrates the latest data with longstanding theory and then analyses this research through the boundary conditions that exist in each area. The volume brings together the research leaders in the field includes chapters on nearly all the major rock coasts of the world and identifies future research needs. Neighbourhood Effects or Neighbourhood Based Problems? David Manley, Maarten van Ham, Nick Bailey, Ludi Simpson, Duncan MacLennan, 2013-06-26 This edited volume critically examines the link between area based policies, neighbourhood based problems and neighbourhood effects. The idea that living in disadvantaged neighbourhoods has a negative effect on residents' life chances over and above the effect of their individual characteristics. Over the last few decades Western governments have persistently pursued area based policies to fight such effects despite a lack of evidence that they exist or that these policies make a difference. The first part of this book presents case studies of perceived neighbourhood based problems in the domains of crime, health, educational outcomes and employment. The second part of the book presents an international overview of the policies that different governments have implemented in response to these neighbourhood based problems and discusses the theoretical and conceptual processes behind place based policy making. Case studies are drawn from a diverse range of countries including the United Kingdom, The Netherlands, Australia, Canada and the USA. Yearbook of International Organizations 2014-2015 (Volume 3) Union of International Associations, Union of International Associations, 2014-08-20 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations currently available. Detailed profiles of international non governmental and intergovernmental organizations IGO collected and documented by the Union of International Associations can be found here. In addition to the history, aims and activities of international organizations with their events, publications and contact details, the volumes of the Yearbook include networks between associations, biographies of key people involved and extensive statistical data. Volume 3 allows readers to locate organizations by subjects or by fields of activity and specialization and includes an index to Volumes 1 through 3.
