dos sexenios dominados por la cruenta guerra contra los carteles del narcotráfico y sus conexiones con importantes políticos empresarios y corporaciones globales Vivian camina dentro de una nube púrpura luego de la destrucción de México entre muertos que no saben que lo están Es una novela compuesta en capítulos que representan cabezas degolladas manos mochadas corazones arrancados Como dice ella me lo dictaron las voces de los desaparecidos que por ahí están Y es la reacción de las mujeres que cuando se les mete algo en la cabeza nadie las puede parar VALKIRIE es un oscuro viaje un trance con una mirada profunda seria pero también magnética en otra dimensión en donde se planea el asesinato de un presidente o dos VALKIRIE tells the story of contemporary Mexico's history specially through the last twelve years dominated by an erratic and strange drug war against the cartels and its connections with important politicians business men and global corporations Vivian walks inside a purple cloud after Mexico ceased to exist walking among mexicans who doesn't know they are already dead Its a novel composed in chapters that represent heads hands legs and hearts dismembered VALKIRIE may be a fiction but its well documented in reality As Vivian one of its characters says it's written by the voices unheard by the lost ones the disappeared the testimony of the dead that still walk around us VALKIRIE its a trip a trance a dark tour de force inside the mind of a girl induced by a new and powerful illegal drug in a plot that has to do with the attempt to kill the president or two

**Galactic Empires** Brian Wilson Aldiss,1979 Galactic Empires is more than an anthology it is a vast two volume novel of the future by some of the 1970's greatest science fiction writers The 26 stories that comprise this anthology create a saga that explores the empire's origin laws mores educational systems as well as the incredible variety of inhabitants and their experience with the natural quirks of the universe *Paracosmicon* Shawn Fluhr,2022-08-22 This book covers a large range of topics including but not limited to depth vs breadth worldbuilding style the design of natural laws for universes geographical features flora and fauna materials settings and genres in universe art and architecture relationships between characters and civilizations cultural traditions governmental systems currency and trade guides on naming various features of a world constructed languages and how to receive and handle feedback as a creator The book contains judicious examples from all types of media and a chapter showing the results of my worldbuilding in relation to the book's content For authorship explanations are given in the context of a creator looking to build a world of fiction for any medium It explores how the environments they create can improve their ability to drive a narrative write compelling plots and characters that interact with that world The book is written with an educational slant and gives a lot of technical information about why things in our world are the way they are and how best to apply the research you do to inspire new creations **Parallel Galactic Memory** CAN BARTU H.,2024-01-01 The human curiosity about the cosmos has historically inspired countless discoveries and innovations This book Parallel Galactic Memory The Layers of Time in the Universe and Cosmic Archives represents an extension of this eternal quest to understand the universe's secrets and its enigmatic aspects It aims to offer a comprehensive exploration of the intricate relationship between time galactic memory and cosmic consciousness Our

understanding of the universe's origins and the birth of time is in constant evolution. From the fundamental theories about the Big Bang to the role of time layers in the cosmos, the topics discussed here illuminate some of the most profound and exciting questions in science. This book goes beyond theoretical and scientific debates to offer insights into the future role of cosmic memory and the shaping of galactic libraries. Each chapter can be seen as a thought experiment designed to push the boundaries of our understanding of the universe's complexity. Themes such as the relationship between knowledge and consciousness, time travel, and galactic memory not only delve into scientific discovery but also explore philosophical and ethical questions. The book aims to guide readers on a daring journey to explore cosmic knowledge. In this journey, we pause at the intersections of the past, present, and future, contemplating a broad spectrum of ideas from the information gathering processes of galaxies to the traces of lost civilizations. Questions such as whether the universe itself possesses a form of consciousness and the ways conscious minds might access galactic memory are central to our exploration. In writing this book, I have endeavored to integrate information from a variety of sources and disciplines. Each chapter is supported by scientific data and in-depth analysis, offering readers a new perspective on the universe and conscious cosmos. This comprehensive work is intended to inspire and inform those seeking to understand the deep layers of cosmic knowledge. I hope this book serves as both an inspiring and informative resource for anyone dedicated to uncovering the mysteries of the cosmos. As we embark on this journey together, I look forward to the possibility of this work being the beginning of many discoveries yet to come. Thank you for joining me on this exploration. There are many more secrets to be uncovered in the depths of the cosmos, and I hope this book marks the start of that journey.

**The Living Galaxy** Eugenio Mieli, Andrea Maria Francesco Valli, Claudio Maccone, 2025-02-14. This book describes the possible distribution of life in the Milky Way. Our description is mathematical in order to be extrapolated from what we know that happened on Earth to what might have happened on the huge number of extrasolar planets existing in the Milky Way Galaxy. We use the statistical Drake equation, which identifies parameters for calculating the total number of life forms at all levels. While the original Drake equation (1961) contained seven factors only, we extend the number of factors to 50, thus incorporating much of the scientific knowledge about the Evolution of Life available in 2024. As such, this book aims at being a narrative of a series of events starting with pre-life epochs and extending them into the present and into the future. This book, while well rooted in scientific and mathematical models, depicts the drama of life, whether it emerges and thrives or succumbs and vanishes. It's a tale of attempts, defeats, and progress unfolding not along the scale of Human Lifetimes but rather along the scale of Galactic Civilizations, billion years long.

**Creators and Friends** Robert Shapiro, 1998-02-01. Humans, creators in training, have a purpose and destiny so heartwarmingly profoundly glorious that it is almost unbelievable from our present dimensional perspective. Humans are great lightbeings from beyond this creation, gaining experience in dense physicality by slowing down the creative process in order to feel the results and consequences of their decisions and actions. This truth about the great

human genetic experiment of the Explorer Race and the mechanics of creation is being revealed for the first time by Zoosh and his friends as humanity begins to awaken to its true nature Zoosh and a great assortment of beings who have never spoken to the physical plane before from particles to All That Is speak vibrantly through superchannel Robert Shapiro Each personality has its own knowing perception and expertise as it shares its history its present focus and the awesome truth about humanity's mission The books read like adventure stories as we follow the clues from this creation we live in out to the Council of Creators and beyond As we explore the greater reality beyond our planet our galaxy our dimension our creation we meet prototypes designers shapemakers creators creators of creators and friends of our Creator who explain their roles in this creation and their experiences before and beyond this creation As our awareness expands about the way creation works our awareness of who we are expands and we realize that a part of ourselves is in that vast creation and that we are much greater and more magnificent than even science fiction had led us to believe Join us in the adventure of discovery It's mind stretching

**The Routledge Companion to Big History** Craig Benjamin, Esther Quaedackers, David Baker, 2019-08-01  
The Routledge Companion to Big History guides readers through the variety of themes and concepts that structure contemporary scholarship in the field of big history The volume is divided into five parts each representing current and evolving areas of interest to the community including big history's relationship to science social science the humanities and the future as well as teaching big history and little big histories Considering an ever expanding range of theoretical pedagogical and research topics the book addresses such questions as what is the relationship between big history and scientific research how are big historians working with philosophers and religious thinkers to help construct meaning how are leading theoreticians making sense of big history and its relationship to other creation narratives and paradigms what is little big history and how does big history impact on thinking about the future The book highlights the place of big history in historiographical traditions and the ways in which it can be used in education and public discourse across disciplines and at all levels A timely collection with contributions from leading proponents in the field it is the ideal guide for those wanting to engage with the theories and concepts behind big history
