Inclusive Educational Administration Mary Konya Weishaar, Phillip M. Weishaar, John C. Borsa, 2014-01-30 The belief that regular and special education administrators should work together to create and maintain successful education programs for all students is not new nor is the assumption that administrator preparation programs should foster the development of an inclusive approach yet this critical educational partnership has not reached its full potential Despite the lack of agreement within the federal legislative branch on exactly what should be changed within our education system some promising points of consensus have emerged competitive grants college and career readiness multi tiered systems of support common core standards a rewards based rather than punitive system for school improvement the critical role of effective teachers and principals increased school choice options and evidence based learning strategies particularly in high need schools The third edition stresses the importance of these key points Each chapter features case studies that simulate real life situations readers are likely to encounter in their careers as administrators Within the safety of the classroom they will rehearse controversial scenarios involving inclusive school governance school reform identification and placement conflict resolution program evaluation fiscal issues transportation and discipline Enhanced practice situations and role play exercises emphasize the special education administrator's role in resolving difficult situations The case study approach is an effective learning tool for aspiring special and regular education administrators and instructors alike fostering enthusiastic classroom discussion and critical thinking about potential solutions to today's complex problems in inclusive educational administration

If Einstein Ran the Schools Thomas

Armstrong Ph.D.,2019-10-11 Many world class thinkers and creators have been concerned about the state of education in the United States Discover their thoughts on how children really learn and what teachers must do to optimally tap children s latent abilities During the last three decades education reformers have pushed standardized testing and policies like No Child Left Behind and Common Core to improve test scores and proficiency in basic skills However during this period that author Thomas Armstrong calls the miseducation of America a number of troubling trends have surfaced including a decrease in creative thinking scores among children in kindergarten through third grade Rather than focus on what s wrong with the education system that has produced these outcomes Armstrong lays out what creative thinkers know about how children should be educated In an extended thought experiment he asks what would happen if we turned the reins of educational policy over not to the politicians and educational bureaucrats but to eminent thinkers and creators like Albert Einstein Pablo Picasso Martin Luther King Jr Rachel Carson Doris Lessing Jane Goodall and other seminal culture builders What might they say about the best way to educate a child If Einstein Ran the Schools suggests that the answers to this intriguing question should guide future efforts to reform our nation s schools
