The English Professor Margaret R. O'Leary/Dennis S. O'Leary, 2016-02-04

Across the span of more than forty years Raphael Dorman O'Leary, a professor of English rhetoric and English literature, taught his students at the University of Kansas to think straight, to put sinew into their sentences, and to embrace the magnificent literary treasures of their mother tongue. *The English Professor* by authors Margaret R. O'Leary and Dennis S. O'Leary offers a narrative of the life work and times of a revered Midwestern university English teacher. This memoir narrates how the professor, born in 1866, was raised on a Kansas farm in the post-bellum era. Like his father before him, he was committed to a life of learning and teaching. His colleagues knew him for his unpretentious exterior, honesty and integrity, and his flashing anger at cheapness, vulgarity, pretense, and above all, charlatanism. When Professor O'Leary died after a short illness in 1936, his personal effects passed through two generations to his grandson, Dennis S. O'Leary, who with his wife Margaret discovered his papers while restoring a family house. The trove of material served as the core resource for the compilation of *The English Professor*. It provides insights into the histories of Kansas and the University of Kansas and of Harvard University, as well as perspectives on higher education, including the teaching of English rhetoric, language, literature, journalism, and oratory in the United States.

The Transnationalized Social Question Thomas Faist, 2018-11-30

The social question is back. Yet today's social question is not primarily between labour and capital as it was in the nineteenth century and throughout much of the twentieth. The contemporary social question is located at the interstices between the global South and the global North. It finds its expression in movements of people seeking a better life or fleeing unsustainable social, political, economic, and ecological conditions. It is transnationalized not only because migrants and their significant others entertain ties across the borders of national states, staying in touch with family and friends, receiving or sending financial remittances in transnational social spaces. Also of importance are cross-border recruitment schemes for workers and the cross-border diffusion of norms appealed to in the case of migration, for example, the social right to decent work as a human right. Moreover, migration can become an issue of inclusion or exclusion in fields important to life chances: in the emigration, transit, or immigration states, a transnationalization of national states. And as in the nineteenth century, political conflicts arise constituting the social question as a public concern. In earlier periods, class differences dominated conflicts. While class has always been crisscrossed by manifold heterogeneities, not least of all cultural ones around ethnicity, religion, and language, it is these latter heterogeneities that have sharpened in situations of immigration and emigration over the past decades. Casting a wide net in terms of conceptual and empirical scope, this book tackles both the social structure and the politics of social

inequalities It sets a comprehensive agenda for research which also includes the public role of social scientists in dealing with the transnationalized social question **General Studies Paper 1 & 2 IAS Prelims 9 Year-wise Solved Papers (2019 - 11)** Disha Experts,2019-09-02 **Everyday Mobile Belonging** Kirsty Finn,Mark Holton,2019-06-13 This book presents a framework for a new kind of thinking about student mobilities and belonging which foregrounds the everyday and rhythmic dimensions of students experiences Using case studies from a variety of UK higher education contexts this book develops the concepts of everyday mobilities and mobile belongingness The authors draw on key ideas about the changing characteristics of UK higher education and of student belonging exploring the central themes of the sensory affective and emotional aspects of student mobilities contested and mobile belongings and the significance of everyday life to bring a new dimension to the literature on inter and intra national student mobilities This is achieved through an examination of the innovative ways in which social science methods have been re imagined through mobility with a specific focus on youth and education Kirsty Finn and Mark Holton bring together theory and research from the fields of education studies geography and sociology and combine this with a discussion of rich empirical data from three UK based research projects to set out an explicitly mobility centred approach to 21st century student experiences The findings can be recognised globally because they synthesise debates about travel and transport students sense of place and feelings of belonging and the interrelationship between physical social and virtual mobilities that higher education brings together In doing so this text offers a coherent and grounded campaign for theory and research within studies of higher education that foreground multiple mobilities and diverse feelings of belonging **Statutes and Ordinances of the University of Cambridge 2015** University of Cambridge,2015-10-08 The official Statutes and Ordinances of the University of Cambridge To Govern the Globe Alfred W. McCoy,2021-11-16 In a tempestuous narrative that sweeps across five continents and seven centuries this book explains how a succession of catastrophes from the devastating Black Death of 1350 through the coming climate crisis of 2050 has produced a relentless succession of rising empires and fading world orders During the long centuries of Iberian and British imperial rule the quest for new forms of energy led to the development of the colonial sugar plantation as a uniquely profitable kind of commerce In a time when issues of race and social justice have arisen with pressing urgency the book explains how the plantation s extraordinary profitability relied on a production system that literally worked the slaves to death creating an insatiable appetite for new captives that made the African slave trade a central feature of modern capitalism for over four centuries After surveying past centuries roiled by imperial wars national revolutions and the struggle for human rights the closing chapters use those hard won insights to peer through the present and into the future By rendering often opaque environmental science in lucid prose the book explains how climate change and changing world orders will shape the life opportunities for younger generations born at the start of this century during the coming decades that will serve as the signposts of their lives 2030 2050 2070 and beyond **Oswaal CDS (Combined Defence Services)**

make The book is structured around three intersecting parts Spaces Identity hybridity Knowledge that broadly follow the trajectory of postcolonial studies since the late 1970s It comprises ten main chapters each of which is situated at the intersections of postcolonialism and critical human geography In doing so Postcolonialism develops three key arguments First that postcolonialism is best conceived as an intellectually creative and practical set of methodologies or approaches for critically engaging existing manifestations of power and exclusion in everyday life and in taken as given spaces Second that postcolonialism is at its core concerned with the politics of representation both in terms of how people and space are represented but also the politics surrounding who is able to represent themselves and on what whose terms Third the book argues that postcolonialism itself is an inherently geographical intellectual enterprise despite its origins in literary theory In developing these arguments and addressing a series of relevant and international case studies and examples throughout Postcolonialism not only demonstrates the importance of postcolonial theory to the contemporary critical geographical imagination It also argues that geographers have much to offer to continued theorizations and workings of postcolonial theory politics and intellectual debates going forward This is a book that brings critical analyses of the continued and omnipresent legacies of colonialism and imperialism to the heart of human geography but also one that returns an avowedly critical geographical disposition to the core of interdisciplinary postcolonial studies
