

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Based on the fieldwork carried out at two elementary schools Merits School and Pioneer School in northeastern China the monograph details how local schools enacted the New Mathematics Curriculum Reform that was launched in early 2000 The trajectory of the reform implementation at each school was plotted out Both schools resorted to a long standing quality control mechanism i e teaching norms to operationalize the reform ideas The mechanism functioned by placing teachers under measurable supervision and evaluation aligned with the reform The schools responded to the reform following school people s raising practical concerns as well as the established school culture Merits School arrived at a two faced strategy to cope with the reform Pioneer School managed to maintain a balance between promoting reform pedagogy and maintaining good test rankings Both schools marginally involved parents in the implementation of the reform This study suggests that to achieve success reformers need to place equal emphasis on the transformation of teachers as well as local policymakers This book enriches the existing literature on the implementation of mathematics curriculum reform at the school level and brings insights into the schools implementation decisions which will appeal to policymakers curriculum researchers and administrators
