Educating Tomorrow's Engineers Great Britain: Parliament: House of Commons: Science and Technology Committee, 2013-02-08 In the UK we teach young people to become computer users and consumers rather than programmers and software engineers This is creating a chronic skills gap in ICT We need around 82 000 engineers and technicians just to deal with retirements up to 2016 and 830 000 SET professionals by 2020 On the plus side the Government's proposal to include computer science as a fourth science option to count towards the EBac is

welcomed The Committee also welcomes the EBac s focus on attainment of mathematics and science GCSEs but is concerned that subjects such as Design and Technology D T might be marginalised A Technical Baccalaureate TechBac is being designed but if it is to be a success schools should be incentivised to focus on the TechBac by making it equivalent to the EBac Reforms to vocational education following the Wolf Review meant that Level 2 of the Engineering Diploma a qualification highly regarded would count as equivalent to one GCSE despite requiring curriculum time and effort equivalent to several GCSEs The Engineering Diploma however is currently being redesigned as four separate qualifications The Committee also expressed concerns over the Department for Education s DfE lack of clarity on its research budget and use of evidence in decision making The DfE needs to place greater focus on gathering evidence before changes to qualifications are made and must leave sufficient time for evidence to be gathered on the effectiveness of policies before introducing further change The possibility of gathering evidence from randomised controlled trials RCTs should be seriously considered

PISA PISA 2012 Results: What Students Know and Can Do (Volume I, Revised edition, February 2014) Student Performance in Mathematics, Reading and Science OECD,2014-02-11 This first volume of PISA 2012 results summarises the performance of students in PISA 2012 It describes how performance is defined measured and reported and then provides results from the assessment showing what students are able to do *Super Courses* Ken Bain,2021-03-09 An exploration of some of the most intriguing college teachers pedagogy challenging traditional learning environments *How Shanghai Does It* Xiaoyan Liang,Huma Kidwai,Minxuan Zhang,Yinan Zhang,2016-04-08 The Shanghai basic education system has garnered significant attention since its extraordinary performance in the 2009 and 2012 Programme for International Student Assessment PISA a global assessment of 15 year olds educational abilities Among the 65 participating economies in 2012 Shanghai China ranked first on all three major domains of PISA i e mathematics reading and science Shanghai also stands out for having the world s highest percentage of resilient students students from socio economically disadvantaged backgrounds who emerge as top performers Shanghai s PISA story has generated intense discussions and diverse speculations in field of international educational development and numerous studies have been done in the attempt to unravel the mystery Missing from the picture however is a more comprehensive systematic in depth and objective rendition of the policies and practices of Shanghai basic education benchmarked against others in key dimensions This report presents an in depth examination of how Shanghai scored highest in the areas of reading science and mathematics on PISA It documents and benchmarks key policies in basic Shanghai education provides evidence on the extent to which these policies have been implemented in schools and explores how these policies have affected learning outcomes The report uses PISA 2012 data to analyze Shanghai student achievement variation and to examine the extent school variables may be associated with the variation beyond family and student background It also uses the World Bank s Systems Approach for Better Education Results SABER an existing systems diagnostic and benchmarking tool as an organizing framework and for data

collection School based surveys and other existing research shed further light on educational impact and implementation While the report attempts to adopt a systems approach particular emphasis is placed on teachers education financing balancing autonomy and accountability and student assessment **Training, Education, and Learning Sciences** Salman Nazir,2025-07-26 Proceedings of the 16th International Conference on Applied Human Factors and Ergonomics and the Affiliated Conferences Orlando Florida USA 26 30 July 2025 *The End of Public Schools* David W. Hursh,2015-10-16 The End of Public Schools analyzes the effect of foundations corporations and non governmental organizations on the rise of neoliberal principles in public education By first contextualizing the privatization of education within the context of a larger educational crisis and with particular emphasis on the Gates Foundation and influential state and national politicians it describes how specific policies that limit public control are advanced across all levels Informed by a thorough understanding of issues such as standardized testing teacher tenure and charter schools David Hursh provides a political and pedagogical critique of the current school reform movement as well details about the increasing resistance efforts on the part of parents teachers and the general public *Reconceptualizing Physical Education through Curricular and Pedagogical Innovations* Joy Butler,2015-07-26 For more than a century formal education has been struggling to redefine itself in response to shifting societal needs new research into human learning and emergent understandings of how the world works Clearly it s difficult to offer advice that is appropriately responsive across this range of influence The collected chapters in this book manage to do that by discarding the popular habit of thinking about Physical Education in terms of opportunities to let off steam or otherwise satisfy the needs of an easily distracted body Rather the gendered acculturated complex body serves as the site of possibility thus framing hopeful rich and timely conceptions of learners learning and teaching The administration of examinations for 15-19 year olds in England Great Britain: Parliament: House of Commons: Education Committee,2012-07-03 This report from the Education Committee looks at the administration of examinations for 15 19 year olds in England The Committee expresses serious concerns about incentives in the exam system and about competition on syllabus content Incentives in the system should be changed so the downward pressure through the competition of exam boards is mitigated The Committee considers a number of options to change incentives including i A single board This offers a simpler system with no risk of competition but the Committee believes the cost risk and disruption outweigh the benefits ii Franchising of subjects to exam boards This removes syllabus competition but again has downsides 3 Or the current system of multiple boards The Committee sees no benefit in competition on syllabus content but the setting and marking of exams and associated administration if properly regulated could generate incentives and drive quality up offering value for money to schools and colleges The Committee also recommends the development of national syllabuses accredited by Ofqual The syllabuses would be developed by exam boards in conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate **The College**
