Serving Library Users from Asia John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g. disabled, Latino, seniors, etc.), few books on serving library users of Asian heritage have been written. Thus, the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters, each on a specific Asian country, culture of East, Southeast, and South Asia, with a wealth of resources for understanding, interacting with, and serving library users of each culture. Resources include cultural guides, both print and online, language helps, sample library vocabulary, Asian booksellers, nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries: public, school, and academic, making this book valuable for all librarians. The demographics of each Asian culture, numbers, and distribution, plus history of immigration and international student enrollment, is also featured. As a bonus, each chapter spotlights a US public school and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more of public, school, and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described: literacy levels, reading cultures, languages, and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

The Bahamas International Monetary Fund. Western Hemisphere Dept.,2018-05-14 This Selected Issues paper makes the case for a rules based fiscal framework for The Bahamas and discusses its design calibration and implementation The IMF staff recommends adopting a headline deficit ceiling and a cap on current expenditure growth both calibrated to guide debt toward a suitable medium term anchor while allowing room for stabilization A headline deficit target is simpler to communicate and monitor than a structural balance rule Such a framework would allow expanding capital spending up to the limit provided by the deficit ceiling in the event of improvements in revenue performance Moreover in line
