Normative Tensions Kevin W. Gray, 2022-06-01 The expansion of Western education overseas has been both an economic success if the numbers of American European and Australian universities setting up campuses in Asia and the Middle East is a measure and a source of consternation for academics concerned with norms of free inquiry and intellectual freedom Faculty at Western campuses have resisted the new satellite campuses fearing that colleagues on those campuses would be less free to teach and engage in intellectual inquiry and that students could be denied the free inquiry normally associated with liberal arts education Critics point to the denial of visas to academics wishing to carry out research on foreign campuses the sudden termination of employment at schools in both the Middle East and Asia or the last minute cancellation of courses at those schools as evidence that they were correctly suspicious of the possibility that liberal arts programs could exist in those regions Supporters of the project have argued that opening up foreign campuses brings free inquiry to closed societies improves educational opportunities for students who would otherwise be denied them or perhaps less frequently that free inquiry will be no more pressured than in the United States or Western Europe Normative Tensions examines the consequences not only of expansion overseas but the increased opening of universities to foreign students

Japan and Germany as Regional Actors Alexandra Sakaki, 2012-09-10 The end of the Cold War and the bipolar era constituted a

significant change in Germany's and Japan's foreign policy settings granting both countries greater leeway to pursue policies divergent from Washington's strategy. This important book fills a gap in the existing literature by employing an explicitly comparative framework for analyzing and evaluating Germany's and Japan's post Cold War regional foreign policy trajectories. Recent non-comparative studies diverge in their assessments of the extent to which the two countries' foreign policies are characterized by continuity or change as while the majority of analyses on Germany find overall continuity in policies and guiding principles prominent works on Japan see the country undergoing drastic change. Through a qualitative content analysis of key foreign policy speeches this book traces and compares German and Japanese national role conceptions by identifying policymakers' perceived duties and responsibilities of their country in international politics. Further through two case studies on missile defence policies and textbook disputes this study investigates actual foreign policy behaviour in order to question the assertion that post Cold War Germany and Japan are following very different paths. Providing a much needed new analysis of German and Japanese foreign policies this book will be of great use to students and scholars interested in Japanese politics, German politics, comparative politics and international relations more generally.
