Seward,2018-12-03 High temperature gas solid reactions are ubiquitous on planetary bodies distributing chemical elements over a range of geologic settings and temperatures This volume reviews the critical role gas solid reactions play in early solar system formation volcanism metamorphism and industrial processes The field evidence experimental and theoretical approaches for examining gas solid reaction are presented building on advances in fields outside of Earth Sciences Computational chemistry techniques are used to probe the nature of molecular clusters and solvation in volcanic vapors and mineral gas reaction mechanisms Specialised analytical methods for characterising solid reaction products are included since these reactions commonly form thin or dispersed films and metastable minerals Finally the volume contains rich field examples laboratory experiments and thermodynamic modelling and kinetics of gas solid reactions on Earth Venus and beyond **Minerals at the Nanoscale** F. Nieto,K.J.T. Livi,2013-05-24 The editors have gathered in this book reviews of

past and current studies of mineral groups that have played important roles in geology environmental science and health science The various chapters cover the application of TEM and related techniques to mineral groups in which TEM investigations have been extensive and crucial to the understanding of their mineralogy namely pyriboles serpentines clays micas and other metamorphic phyllosilicates oxides and oxyhydroxides sulfides and carbonates Some research fields for which TEM is particularly suitable and which have produced significant advances in particular are inclusions and traces extraterrestrial material deformation processes non stoichiometry and superstructures and biominerals Nowadays we are witnessing the push for the improvement of detectors for imaging direct detection of electrons and X rays silicon drift detectors and annular high solid angle of collection detectors the development of new support materials e g graphene and liquid cells for TEMs Most of these new technologies have not yet been applied to mineralogical problems but we hope they
