Why Industry 4.0 Sucks! Alasdair Gilchrist,2022-12-14 Why Industry 4 0 Sucks Renegade reveals the fallacies febrile fantasies fabulous fiction and flatulent fibs that are fuelling the feeble fabrication behind the 4th Industrial Revolution For almost a decade now I have been heavily involved with Manufacturers Industries and Universities in researching Industry 4 0 from a theoretical academic and practical perspective I have always been intrigued by the manufacturing phenomena that is Industry 4 0 So much so that I wrote a best selling book Industry 4 0 The Industrial Internet of Things I was so impressed I bought into the promise and seemingly endless potential with great gusto The future seemed bright and Industry 4 0 was the future I revisited my old haunting ground with the full intention of updating and revising my earlier book which was published by Springer in early 2015 with a new edition for 2022 What I discovered appalled me Industry 4 0 once the proud and enviable flagship policy for European Manufacturing and the inspiration for many Industry 4 0 initiatives around the globe was now a shambolic derelict town Not only was its very name misappropriated and used as a soulless generic label

leaving it eviscerated of all concepts principles and purpose it is now a meaningless synonym for the equally vacuous 4th Industrial Revolution a zombie I In this book I will detail how and why it all went wrong for Industry 4 0 with quantifiable and documented evidence of its Cathartic collapse and at whose hands I will explain the avoidable reasons behind the staggering failure rate Indeed just over 1% of those who embarked on the journey were able to claim a return of any value in the form of productivity efficiency customer experience supply chain integration smart factories or embarrassingly any value at all let alone the desperate hopes of a return on investment In the EU the UK India China and even the US Industry 4 0 has failed The EU commission in 2021 branded Industry 4 0 unfit for purpose and one of the root causes for many of the problems society faces today such as technology monopolies and giant wage disparity this was coming from Industry 4 0 s sponsor and authors However Industry was not a technology it was a policy with a robust strategy If it failed it was due to human ignorance hubris and greed rather than any inherent technical deficiencies albeit it was rife with contradictions ambiguity and confusion certainty of its own making But Industry 4 0 s failure was a failure of business technology and consultancy hyperbole not of its inherent policy But all is not lost there is still hope that Industry 4 0 is redeemable and as such I propose some tried and tested methods that could help you avoid the all too common mistakes and missteps that plagued Industry 4 0 from the outset and that still prevail even today Forewarned is forearmed and this information will greatly assist you along your own Industry 4 0 journey I strongly recommend that you do not undertake an Industry 4 0 journey or even a pilot project before reading this book in its entirety or you will surely fail Well 99% of the time
