Ignasi Navarro I Ferrando, *Current Approaches to Metaphor Analysis in Discourse*, Boston: De Gruyter Mouton, 2019; vii + 381 pp., €26.95 (pbk).

Reviewed by: Shanshan Pei, *Beijing Language & Culture University, China*

Great importance has been attached to exploring metaphors in discourses because they are conducive to discourse coherence and can enact a textual aesthetic simultaneously. In order to interpret its essence in discourses, researchers utilize several effective technological approaches and tools. *Current Approaches to Metaphor Analysis in Discourse* is such a book dedicated to this issue, which aims to promote the latest research on the working mechanism and the classification of metaphors (p.6).

The book introduces a way to improve the efficiency of metaphor analyses in theoretical and practical approaches like mental-space-theory and frame-based approaches, etc.

Structurally, the volume consists of 16 chapters and is divided into three parts. Part I is the introduction. It outlines the contributions of this volume, from which we can get a general understanding of metaphorical knowledge. Kovecses initially interprets a schematic hierarchy of terms in Conceptual Metaphor Theory (CMT) like ‘image schema’ and ‘domain’ to discuss the creation of metaphorical thinking in human mind. Oster’s and Cai and Deignan’s research delivers cross-cultural descriptions of metaphorical words in different languages and inspires the researchers with the cross-culture approach, indicating the connections between genres, cultures and metaphors. Isaeva, Burdina, Apresjan, Blasco, Garcia and Renau take the cognitive-discursive approach to discuss the etymological and metaphorical consistency of professional terms in medical, pharmaceutical and computer discourses, summarizing the latest progress in the study of the examination for conceptual structures of metaphorical terms. Based on these studies, the readers can understand the correlation between semantics of specific phrases and their morphosyntactic properties. Dilai and Serafin shed light on cognitive models underlying metaphors in political discourses. Contemporary Conceptual Metaphor Theory offers strong theoretical support for this analysis. These metaphors mirror the influence of history, culture and society on the metaphorical expressions in the Euromaidan discourse.

Part II is devoted to the consciousness in human mind to structure metaphors in real contexts. ‘Deliberate metaphor’ is the key concept of this part. Cuccio and Steen explain

Ignasi Navarro Ferrando Book:

In-roads of Language Ignasi Navarro Ferrando, Nieves Alberola Crespo, 2006 In roads of Language caps an ensemble of many varied interesting and spirited articles of appealing claim specially garnered for students looking for new insights and usefully dedicated to advanced scholars that may battle in recent trends in English studies *Current Approaches to Metaphor Analysis in Discourse* Ignasi Navarro i Ferrando, 2019-09-02 This volume takes up the challenge of surveying the present state of a variety of approaches to the identification analysis and interpretation of metaphor across communication channels situational contexts genres and social spheres It reflects three foremost trends of present metaphor research namely the communicative approach the cognitive modelling approach and the multimodality approach These trends are considered as areas of research emerging on the ground of the Conceptual Metaphor Theory initiated by Lakoff The book intends to show their concomitances as well as mark their diversifying paths The aim is to bring about and make apparent the many connections among assumingly different trends stemming from CMT Whereas discrepancies between communicative and conceptual perspectives might seem irredeemable the book emphasizes and claims that the background framework of CMT provides a solid foundation for collaboration and mutual influence Consequently the analysis of metaphor usage in context may provide insights for cognitive modelling proposals The analysis of cognitive configuration of conceptual domains may in turn illuminate our understanding of communicative decisions in discourse The integration of multimodal metaphor analysis puts forward the idea that diverse modal manifestations of metaphor reveal the symbiosis between communicative and cognitive stances The various subject areas and methodologies illuminate the scene of current research in the field The poignant contributions open far reaching avenues into the realm of human thought and discourse Toward a Motivation Model of Pragmatics Rong Chen, 2022-07-18 With the discursive turn has come a distrust a complete rejection by some of theories that seek deeper reasons for surface phenomena Rong Chen argues that this distrust with its accompanying overemphasis on specificity and fluidity of linguistic meaning and social values is unwarranted and unhelpful Drawing on insights from social theories and various strands of pragmatics he proposes a motivation model of pragmatics MMP contending that language use can be adequately coherently and elegantly studied via the motivation behind it in its varied and dynamic contexts The model with its well laid out components is then applied to im politeness research cross cultural pragmatics diachronic pragmatics discourse and genre analysis conversation analysis identity construction and the study of metaphor sarcasm parody and lying MMP is thus a framework aimed at accounting for fluidity with stable notions specificity with general principles and differences with similar underlying factors As such the book should appeal to students of pragmatics im politeness conversation analysis sociolinguistics applied linguistics communication sociology and psychology Cognitive and Discourse Approaches to Metaphor and Metonymy José Luis Otal, José Luis Otal Campo, Ignasi Navarro i Ferrando, Begoña Bellés Fortuño, 2005 The intention of the work was to bring together different perspectives on the

issue of making compatible Discourse Analysis and Cognitive Linguistics particularly in relation with metaphor and metonymy phenomena

From Perception to Meaning Beate Hampe, 2008-08-22 The 1987 landmark publications by G Lakoff and M Johnson made image schema one of the cornerstone concepts of the emerging experientialist paradigm of Cognitive Linguistics a framework founded upon the rejection of the mind body dichotomy and stressing the fundamentally embodied nature of meaning imagination and reason hence language Conceived of as the pre linguistic dynamic and highly schematic gestalts arising directly from motor movement object manipulation and perceptual interaction image schemas served to anchor abstract reasoning and imagination to sensori motor patterns in the conceptual theory of metaphor Being itself informed by preceding crosslinguistic work on semantic primitives in the linguistic representations of spatial relations carried out by L Talmy R Langacker and others the notion has inspired a large amount of subsequent research and debate on diverse issues ranging from the meaning structure and acquisition of natural languages to the embodied mind itself From Perception to Meaning is the first survey of current image schema theory and offers a collection of original and innovative essays by leading scholars many of whom have shaped the theory from the very beginning The edition unites essays on major issues in recent research on image schemas from aspects of their definition and linguistic formalization their psychological status and neural grounding to their role as semantic universals and primitives in language acquisition The book will thus not only be welcomed by linguists of a cognitive orientation but will prove relevant to philosophers psychologists and anthropologists interested in language and indeed to anyone studying the embodied mind

Visual Metaphors and Aesthetics Michalle Gal, 2022-05-19 This book offers a new definition of metaphor as an ontological and visual construction whose roots are external visual forms and its motivation is our attachment to forms This definition which Michalle Gal names visualist challenges the ruling conceptualist theory of metaphors and places a new emphasis on how we experience rather than understand metaphors In doing so she responds to the visual turn that is taking place in literature and the media demanding that the visual become a site of philosophical analysis This focus on the external visual world allows Gal to employ visual theories to capture the essence of metaphor She looks beyond conceptual or semantic mechanism and returns to theories of Arnheim and Gombrich and the current evolution of ideas about the visual or material and embodied cognition Proposing to see visual metaphors in their basic form she uses a new externalist terminology of ontology visuality composition affordance construction and emergence Setting out a new theory that takes into account that humans are visual no less than cognitive creatures Visual Metaphors and Aesthetics lays the foundation for a new vocabulary to talk about metaphors

Variation in Metonymy Weiwei Zhang, 2016-04-11 The monograph presents new findings and perspectives in the study of variation in metonymy both theoretical and methodological Theoretically it sheds light on metonymy from an onomasiological perspective which helps to discover the different conceptual or lexical pathways through which a concept or a group of concepts has been designated by going back to the source concepts In addition it broadens the perspective of

Cognitive Linguistics research on metonymy by looking into how metonymic conceptualization and usage may vary along various dimensions Three case studies explore significant variation in metonymy across different languages time periods genres and social lects Methodologically the monograph responds to the call in Cognitive Linguistics to adopt usage based empirical methodologies The case studies show that quantification and statistical techniques constitute essential parts of an empirical analysis based on corpus data The empirical findings demonstrate the essential need to extend research on metonymy in a variationist Cognitive Linguistics direction by studying metonymy s cultural historical and social lectal variation

Metaphor and Mills Honesto Herrera-Soler, Michael White, 2012-07-04 While the role of metaphor in economics and business has produced multiple research articles no comprehensive book length study has yet appeared The present book is a timely attempt to fill this gap giving a global coverage of the role of metaphor in business and economics It spans time from Classical Greece to the current business network meeting room space from Europe through the Americas to Asia cultures and languages from continental European languages Brazilian Portuguese to Chinese The theoretical grounding of the book is the Conceptual Theory of Metaphor taken in a dynamic sense as evolving with on going research The theory is thus used adapted and refined in accordance with the evidence provided Metaphor is shown to be theory constitutive in the elaboration of economic thinking down through the ages while at the same time the emphasis on evidence open to historical cross cultural and cross linguistic considerations align with the current notion of situatedness The book is a rich source of information for researchers and students in the fields of Metaphor Studies Economics Discourse Analysis and Communication Studies among others

Reading Skin in Medieval Literature and Culture K. Walter, 2013-03-20 Skin is a multifarious image in medieval culture the material basis for forming a sense of self and relation to the world as well as a powerful literary and visual image This book explores the presence of skin in medieval literature and culture from a range of literary religious aesthetic historical medical and theoretical perspectives

Perspectives on Prepositions Hubert Cuyckens, Günter Radden, 2013-07-31 In the past two decades the study of prepositions has grown steadily The papers collected in this volume bring together the multifaceted perspectives on prepositions that have been developed in contemporary linguistics Some papers mainly discuss syntactic and morphological aspects of prepositions other papers predominantly focus on cognitive aspects All the papers are however concerned with the semantics of prepositions This volume evolved from a workshop on prepositions held at Hamburg University on June 26 and 27 1998
