Applied Logistic Regression David W. Hosmer, Jr., Stanley Lemeshow, 2004-10-28 From the reviews of the First Edition An interesting useful and well written book on logistic regression models Hosmer and Lemeshow have used very little mathematics have presented difficult concepts heuristically and through illustrative examples and have included references Choice Well written clearly organized and comprehensive the authors carefully walk the reader through the estimation of interpretation of coefficients from a wide variety of logistic regression models their careful explication of the quantitative re expression of coefficients from these various models is excellent Contemporary Sociology An extremely well written book that will certainly prove an invaluable acquisition to the practicing statistician who finds other literature on analysis of discrete data hard to follow or heavily theoretical The Statistician In this revised and updated edition of their popular book David Hosmer and Stanley Lemeshow continue to provide an amazingly accessible introduction to the logistic regression model while incorporating advances of the last decade including a variety of software packages for the analysis of data sets Hosmer and Lemeshow extend the discussion from biostatistics and epidemiology to cutting edge applications in data mining and machine learning guiding readers step by step through the use of modeling techniques for dichotomous data in diverse fields Ample new topics and expanded discussions of existing material are accompanied by a wealth of real world examples with extensive data sets available over the Internet

Growth in Science and Technology H. Arend,J. Hulliger,2012-12-06 Science and art of crystal growth represent an interdisciplinary activity based on fundamental principles of physics chemistry and crystallography Crystal growth has contributed over the years essentially to a widening of knowledge in its basic disciplines and has penetrated practically into all fields of experimental natural sciences It has acted more over in a steadily increasing manner as a link between science and technology as can be seen best for example from the achievements in modern microelectronics The aim of the course Crystal Growth in Science and Technology being to stress the interdisciplinary character of the subject selected fundamental

principles are reviewed in the following contributions and cross links between basic and applied aspects are illustrated It is a very well known fact that the intensive development of crystal growth has led to a progressive narrowing of interests in highly specialized directions which is in particular harmful to young research scientists The organizers of the course did sincerely hope that the program would help to broaden up the horizon of the participants It was equally their wish to contribute within the traditional spirit of the school of crystallography in Erice to the promotion of mutual understanding personal friendship and future collaboration between all those who were present at the school
