## **Journals Impact Factor Ranking:**

*Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis* Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrops rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

*Journals of the Century* Tony Stankus, 2019-12-06 This book first published in 2002 gathers some of America s top subject expert librarians to determine the most influential journals in their respective fields 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide Their choices reflect the history of each discipline or profession taking into account rivalries between universities professional societies for profit and not for profit publishers and even nation states and international ideologies in each journal s quest for reputational dominance Each journal was judged using criteria such as longevity of publication foresight in carving out its niche ability to attract none are in the employ of any publisher but each is fully credentialed and well published and many are award winners The authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele

**Impact of Global University Ranking Systems on Developing Countries** Onyancha, Omwoyo Bosire, Tella, Adeyinka, 2023-06-01 The emotive discourses on the subject of university rankings are directly linked to the effect of such rankings on the performance of universities throughout the world It has been observed that the top ranked universities attract major financial commitments from the industry the best students quality researchers and a wide range of other quality endowments such as equipment libraries and laboratories It is not surprising that the ranking of universities has gained popularity and become a significant factor shaping not only the reputation of universities but also the performance of said institutions around the world including the developing countries

Impact of Global University Ranking Systems on Developing Countries presents a collection of perspectives from scholars and other stakeholders on the impact of the global ranking systems on developing countries The book is an additional resource for discussion and discourse as far as the global university ranking systems are concerned and opens new frontiers for further research Covering key topics such as assessment ethics and academic freedom this premier reference source is ideal for administrators policymakers researchers scholars academicians practitioners instructors and students

*Multidimensional Journal Evaluation* Stefanie Haustein,2012-04-26 Scientific communication depends primarily on publishing in journals The most important indicator to determine the influence of a journal is the Impact Factor Since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical This book defines five dimensions which build a framework for a multidimensional method of journal evaluation The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011 **Higher Education Rankings and Their Worldwide Significance** Mustafa Kayyali,2025-11-25 In an era where education is seen as a cornerstone for social progress economic development and global competitiveness understanding the intricacies of higher education rankings has become crucial This new volume provides a comprehensive examination of higher education rankings highlighting their significant influence on the global higher education landscape It discusses the history significance and impact of higher education rankings and then delves into the metrics and ranking methodologies the pros and cons of ranking systems the academic research and socioeconomic implications the role of citations and publications in research based rankings and much more Offering a thorough exposition of the convoluted web of higher education rankings this volume will be a valuable reference for academicians policymakers and administrators exposing the channels by which rankings might drive the development of techniques and research systems on a worldwide scale The Global University Rankings Akram Jalal-Karim,2022-12-20 This book is intended to provide the reader a thorough grasp on Global University Ranking Systems GURs Many educational authorities throughout the world have recently started regularly assessing the effectiveness of their educational institutions based on their global rankings Moreover some institutions use the indicators of these rankings as an objective in their strategic plan however many academics do not trust such systems believing that they deceive their educational institutions that these rankings are inaccurate and may be biased and thus do more harm to their universities programmes than good In this book the author draws attention to the role of higher education institutions and how important it is to make global ranking indicators part of their strategic plans and thus it is imperative for all academic and administrative members to work together on planning and implementing them in order to advance the academic performances and strengthen those indicators which consequently leads to raising their rankings at the league tables of the major Global University Rankings GURs The author discusses the ranking indicators from the perspective of academic performance and focuses on the challenges facing higher education institutions at various levels especially improving the five

main academic pillars that the rankings outcomes are based on teaching and learning research and publishing strategic planning internationalisation and reputation

Erkkilä, 2013-09-26 *Global University Rankings* explores the novel topic of global university rankings and their effects on higher education in Europe The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies disciplinary traditions and higher education institutions The first global university rankings were published less than a

decade ago but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education. The rankings have portrayed European academic institutions in a varying light. There is intense reflexivity over the figures leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries. The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe.

**Recent Advances in Game Theory and Applications** Leon A. Petrosyan, Vladimir V. Mazalov, 2016-09-30 This contributed volume contains fourteen papers based on selected presentations from the European Conference on Game Theory SING11 GTM 2015 held at Saint Petersburg State University in July 2015 and the Networking Games and Management workshop held at the Karelian Research Centre of the Russian Academy of Sciences in Petrozavodsk Russia also in July 2015. These papers cover a wide range of topics in game theory including recent advances in areas with high potential for future work as well as new developments on classical results. Some of these include: A new approach to journal ranking using methods from social choice theory; A differential game of a duopoly in which two firms are competing for market share in an industry with network externalities; The impact of information propagation in the model of tax audits; A voting model in which the results of previous votes can affect the process of coalition formation in a decision making body; The Selten Szidarovsky technique for the analysis of Nash equilibria of games with an aggregative structure; Generalized nucleoli and generalized bargaining sets for games with restricted cooperation; Bayesian networks and games of deterrence; and A new look at the study of solutions for games in partition function form. The maturity and vitality of modern day game theory are reflected in the new ideas, novel applications and contributions of young researchers represented in this collection. It will be of interest to anyone doing theoretical research in game theory or working on one of its numerous applications.

*How Scientists Communicate* Alan Kelly, 2020-07-01 The transmission of information transcends time. Since the beginning of humanity, people have shared stories, dreams, wishes, and findings. Within a scientific context, the delivery of information is especially important. Researchers have been sharing their ideas and building on the work of others for as long as we have studied our world. How can a researcher ensure their ideas will be shared most effectively with the next generation? In *How Scientists Communicate*, Alan Kelly accompanies readers through the many processes of scholarly communication within the field of science. The chapters include an analysis of modern scientific communication, an overview of the historical development of such communication, the nature and goals of a scientific research paper, as well as practical and applicable information for researchers. He explores scientific communication from various perspectives, including the writing process, stages of writing, evaluation through peer review, publication, and what happens afterwards. This exploration into scientific writing emphasizes the importance of readability and writing for the intended audience. Kelly engages with landmark historical papers, but he doesn't shy away from his own experiences and opinions. This treatise on the art of scientific communication is interesting for readers with various levels of

experience making this book a go to resource for anyone trying to share their ideas within the scientific community or interested in how the outputs of science impact our world

**A Concise Guide to Communication in Science and Engineering** David H. Foster, 2017-10-27 Success in scientific and engineering research depends on effective writing and presentation The purpose of this guide is to help the reader achieve that goal It enables students and researchers to write and present material to a professional modern standard efficiently and painlessly and with maximum impact The approach is not prescriptive Rather the emphasis is on a logical approach to communication informed by what needs to be achieved what works in practice and what interferes with success Over 400 examples of good and bad writing and graphing are presented Each is from a published research article and is accompanied by analysis comment and correction where needed Journal reviewers critiques of submitted manuscripts are included to illustrate common pitfalls Above all this is a how to book comprehensive but concise suitable for continuous study or quick reference Checklists at the end of each chapter enable the reader to test the readiness of a dissertation journal submission or conference presentation for assessment or review Although oriented towards engineering and the physical and life sciences it is also relevant to other areas including behavioural and clinical sciences and medicine
