Jxta Programmers Guide:

Practical JXTA II Jérôme Verstrynge, Jérôme Verstrynge, 2010-07-19 Practical JXTA II is a revision of the first edition containing new and updated examples covering the latest delivered features This book is an introduction to JXTA JXSE and P2P A new chapter about NAT traversal has been added **Mastering JXTA** Joseph D. Gradecki, 2002-10-15 A comprehensive code intensive guide to building commercial quality peer to peer applications with JXTA and Java Tens of millions of people use peer to peer P2P applications such as KaZaA AOL Instant Messenger and Distributed net These applications harness the idle CPU cycles of their host computers to produce enormous databases of information build powerful processing engines and enable communication and file sharing among users around the world Previously P2P applications have been built using proprietary technologies and protocols forcing developers to start from scratch each time they write a new application Now JXTA an open source P2P development technology enables developers to build P2P applications using Java XML and other industry standards With this invaluable book Joseph Gradecki provides a practical guide to building peer to peer applications using Java He provides detailed descriptions of the JXTA technologies and demonstrates how to build real world applications This book also includes Detailed descriptions of the JXTA specification and the Java reference implementation The complete P2P development process including how to build reusable application frameworks Fully functional example applications including a distributed computational engine that can utilize the idle CPU power of thousands of remote machines to solve complex problems and a fault tolerant encrypted network storage system The companion Web site includes All the code listings and complete applications from the book Links to additional JXTA and P2P resources *On the Move to Meaningful Internet Systems 2004: CoopIS, DOA, and ODBASE* Zahir Tari, 2004-10-11 A special mention for 2004 is in order for the new Doctoral Symposium Workshop where three young postdoc researchers organized an original setup and formula to bring PhD students together and allow them to submit their research proposals for selection A limited number of the submissions and their approaches were independently evaluated by a panel of senior experts at the conference and presented by the students in front of a wider audience These students also got free access to all other parts of the OTM program and only paid a heavily discounted fee for the Doctoral Symposium itself In fact their attendance was largely sponsored by the other participants If evaluated as successful it is the intention of the General Chairs to expand this model in future editions of the OTM conferences and so draw in an audience of young researchers to the OnTheMove forum All three main conferences and the associated workshops share the distributed aspects of modern computing systems and the resulting applications pulled created by the Internet and the so called Semantic Web For DOA 2004 the primary emphasis stayed on the distributed object infrastructure for ODBASE 2004 it was the knowledge bases and methods required for enabling the use of formal semantics and for CoopIS 2004 the main topic was the interaction of such technologies and methods with management issues such as occurs in networked organizations These subject areas naturally overlap and many submissions in
