Miller, 2003 The first comprehensive review of credit reporting systems worldwide including their institutional forms and evidence of their impact on financial markets Credit reporting is a critical part of the financial system in most developed economies but is often weak or absent in developing countries It addresses a fundamental problem of credit markets asymmetric information between borrowers and lenders that can lead to adverse selection and moral hazard The heart of a credit report is the record it provides of an individual's or a firm's payment history which enables lenders to evaluate credit risk more accurately and lower loan processing time and costs Credit reports also strengthen borrower discipline since nonpayment with one institution results in sanctions with others This book provides the first comprehensive review of credit reporting systems worldwide and documents the rapid growth in the industry It offers empirical and theoretical evidence of the impact of credit reporting on financial markets using examples from both developed and developing economies Credit reporting it shows significantly contributes to predicting default risk of potential borrowers
