Meme Wars The Creative Destruction Of Neoclassical Economics:

Meme Wars Kalle Lasn, Adbusters, 2013-01-15 From the editor and magazine that started and named the Occupy Wall Street movement *Meme Wars The Creative Destruction of Neoclassical Economics* is an articulation of what could be the next steps in rethinking and remaking our world that challenges and debunks many of the assumptions of neoclassical economics and brings to light a more ecological model *Meme Wars* aims to accelerate the shift into this new paradigm that takes into account psychonomics, bionomics and other aspects of our physical and mental environment that are often left out in discussions of economics Like Adbusters the book will be image heavy and full color throughout Lasn calls it a textbook for the future that provides the building blocks in texts and visuals for a new way of looking at and changing our world Through an examination of alternative economies Lasn hopes to spur students to become barefoot economists and to see that a humanization of economics is possible *Meme Wars* will include contributions from Nobel Prize winner Joseph Stiglitz, Paul Samuelson, George Akerlof, Lourdes Bener, Julie Matthaei, Manfred Max Neef, David Orrell, Paul Gilding, Mathis Wackernagel and the father of ecological economics, Herman Daly among others Based on ideas that were presented in a special issue of Adbusters entitled *Thought Control in Economics Beyond the Growth Paradigm: An Activist Toolkit* *Meme Wars* will help move forward the Occupy Wall Street movement *Left Theory and the Alt-Right* Jeffrey R. Di Leo, Sophia A.

McClennen, 2023-08-23 The alt right movement in the United States has actively been endorsing the use of left theory to achieve its ends and with varying degrees of success Tracing occasions where figures on the alt right reference left theory this volume asks if the alt right's reference of left theory is just bad reading or are there troubling ways that certain types of left theory encourage such interpretations What if the connections between left theory and the alt right lie in the shared disdain for certain types of institutions, structures of power and the status quo Are there lessons to be learned in what can often appear as an overlapping desire to deconstruct concepts like truth, justice, freedom and democracy Drawing on the longer history of right wing readings of left theory this volume seeks to unpack these recent developments and consider their impact on the future of theory

Online Hate on Social Media Ahmed Al-Rawi, 2024-06-27 The book empirically investigates various tactics, approaches, and digital communities that play a role in the propagation of online hate on social media. I use a mixed method approach involving manual and automated analysis of social media data mostly taken from Twitter, Instagram, and Telegram. Though no book can be comprehensive enough, this manuscript offers the reader a modest understanding of the important aspects that negatively impact certain communities such as racialized groups and women. The quality of online hate becomes notably different at the intersection of these identities, especially when taking into account religion, ethnicity, gender, and race.

Cultures of Violence Ruth Kinna, Gillian Whiteley, 2020-04-16 Investigating art practitioners' responses to violence, this book considers how artists have used art practices to rethink concepts of violence and non-violence. It explores the strategies that artists have deployed to expose physical and symbolic violence through representational, performative, and interventional means. It examines how intellectual and material contexts have affected art interventions and how visual arts can open up critical spaces to explore violence without reinforcement or recuperation. Its premises are that art is not only able to contest prevailing norms about violence but that contemporary artists are consciously engaging with publics through their practice in order to do so. Contributors respond to three questions: how can political violence be understood or interpreted through art? How are publics understood or identified? How are art interventions designed to shift challenge or respond to public perceptions of political violence and how are they constrained by them? They discuss violence in the everyday and at state level: the Watts Rebellion and Occupy repression in Russia, domination in Hong Kong, the violence of migration, and the unfolding art activist logic of the sigma portfolio. Asking how public debates can be shaped through the visual and performing arts and setting taboos about violence to one side, the volume provides an innovative approach to a perennial issue of interest to scholars of international politics, art, and cultural studies.
