the tax system but changes in the political climate will force change as will many other competing pressures With this pace of change it is easy to focus on the practical and forget the core underpinnings of the tax system and their philosophical justifications Taking a pause to remind ourselves of those principles and how they can operate in the modern tax system is crucial to ensuring that the tax system does not diverge too far from what it should be or could be It is essential to understand the answers to some of the seemingly basic questions that surround tax before we can even begin to think about what a tax system should look like This collection brings together major themes and difficult questions in the philosophical foundations of tax law The chapters consider practical issues such as justification enforcement design and mechanics and provide a full and coherent analysis of the basis for tax law Philosophical Foundations of Tax Law allows the reader to consider how tax systems should move forward in the modern world with a sound philosophical basis to provide the practical tax system that the state requires and citizens deserve Sustainability, Technology and Innovation 4.0 Zbigniew

**From Migrant to Worker** Michele Ford, 2019-04-15 What happens when local unions begin to advocate for the rights of temporary migrant workers asks Michele Ford in her sweeping study of seven Asian countries Until recently unions in Hong Kong Japan Malaysia Singapore South Korea Taiwan and Thailand were uniformly hostile towards foreign workers but Ford deftly shows how times and attitudes have begun to change Now she argues NGOs and the Global Union Federations are encouraging local unions to represent and advocate for these peripheral workers and in some cases succeeding From Migrant to Worker builds our understanding of the role the international labor movement and local unions have had in developing a movement for migrant workers labor rights Ford examines the relationship between different kinds of labor movement actors and the constraints imposed on those actors by resource flows contingency and local context Her

conclusions show that in countries Hong Kong Malaysia and Thailand where resource flows and local factors give the Global Union Federations more influence local unions have become much more engaged with migrant workers But in countries Japan and Taiwan for example where they have little effect there has been little progress While much has changed Ford forces us to see that labor migration in Asia is still fraught with complications and hardships and that local unions are not always able or willing to act

International Agreements between Non-State Actors as a Source of International Law Melissa Loja, 2022-09-22 This book examines whether international agreements between non state actors can be identified as a source of international law using objective criteria It asks whether beyond Article 38 of the Statute of the International Court of Justice there is a system of rules processes beliefs or semantics by which these agreements can be objectively identified as a source of international law Departing from the more usual state centric analysis it adopts postmodern legal positivism as its analytical tool This allows for the reality that international law making takes place in subjective social landscapes To test the effectiveness of this approach it is applied to agreements between petroleum agencies and corporations which allow two or more states to exploit disputed resources across boundaries looking in particular at arrangements involving China Vietnam and the Philippines By so doing it illustrates an alternative way that states can manage disputes without having to resort to conflict It will appeal to both scholars and practitioners of public international law as well as civil servants
