Aerospace Reports, 1995 *The Politics of Professionalism* Gary McCulloch, Gill Helsby, Peter Knight, 2000-05-01 Many commentators feared that the Education Reform Act of 1988 sounded the death knell for teacher professionalism in Britain. More than a decade later however professionalism appears to have staged a miraculous recovery. David Blunkett says that it is back at the very heart of teaching. But what kind of professionalism is this? In whose interest is its recovery and what effects will it have? And how does this development relate to changes in other professions? The Politics of Professionalism provides authoritative answers to these questions. It does so by setting the debates in their historical context and by drawing on detailed research findings on teachers' experience of work and education especially the curriculum in the current era. In the process this book makes a major contribution to our understanding of the politics, history and sociology of teaching and the other professions. **Title List of Documents Made Publicly Available**, 1986 Time Series in the Time Domain Edward James Hannan, P. R. Krishnaiah, Malempati Madhusudana Rao, 1985 Hardbound. In this volume prominent workers in the field discuss various time series methods in the time domain. The topics included are autoregressive moving average models, control estimation, identification, model selection, non-linear time series, non-stationary time series, prediction, robustness, sampling designs, signal attenuation and speech recognition. This volume complements Handbook of Statistics 3: Time Series in the Frequency Domain. **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1969 Geography in British Schools, 1885-2000 Rex Walford, 2019-07-23. This history charts how geography rose to popularity on a tide of imperial enthusiasms in Victorian times and made its way into many elementary schools in the latter half of the 19th century. Many geography lessons were not dominated by the rote learning of capes and bays and some of the pioneers of the subject led the way in the use of models, visual aids and object lessons in schools. The book explores Scott Keltie's report of 1886 as a catalyst for development. Despite the founding of the Geographical Association in 1893 the subject needed a series of concerted political campaigns in the early 20th century to establish itself in the secondary sector. The growth of the regional approach, field work and of sample studies expanded the subject between the world wars before a major conceptual revolution invigorated and challenged teachers of the subject in the post-war period.

Geography in British Schools, 1850-2000 Rex Walford, 2001. This history of geography as a major subject in the British school curriculum in the past 150 years deconstructs some of the myths which have grown up around school geography. The Victorian image considers geography's struggle for examination recognition in the early years of the 20th century and describes periods of different emphases in the field. It analyzes the revolution in teaching geography in the 1960s and 1970s and examines the effect of the National Curriculum. Includes black and white historical photos. Walford taught postgraduate courses for geography teachers at the University of Cambridge from 1973 to 1999. Distributed by ISBS c Book News Inc.
