aviators McCain nevertheless brought fresh approaches and innovation to naval aviation His prewar and initial wartime commands encompassed tender based and shore based aviation which were critical to early operations in the Pacific yet McCain also understood the power and potential of carrier based aviation initially as commanding officer of the USS Ranger before the war then as a carrier task force commander under Adm William F Halsey in the Pacific in 1944 and 1945 Moreover he served tours as Chief of the Bureau of Aeronautics and the first Deputy Chief of Naval Operations Air in 1942 1944 In these posts he witnessed and played a role in the culmination of naval air power as a means of delivering crippling blows to the enemy s homeland McCain was among only a handful of officers who achieved prominence during the war and who had experience in all of these varied and challenging levels of command *Earned Citizenship* Michael J.

Sullivan,2019-03-19 The migration and settlement of 11 million unauthorized immigrants is among the leading political challenges facing the United States today The majority of unauthorized immigrants in the U S have been here for more than five years and are settling into American communities working forming families and serving in the military even though they may be detained and deported if they are discovered An open question remains as to what to do about unauthorized immigrants who are already living in the United States On one hand it is important that the government sends a message that future violations of immigration law will not be tolerated On the other sits a deeper ethical dilemma that is the focus of this book what do the state and citizens owe to unauthorized immigrants who have served their adopted country *Earned Citizenship* argues that long term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship through service in their adopted communities Their service would act as restitution for immigration law violations Military service in particular would merit naturalization in countries with a strong citizen soldier tradition including the United States The book also considers the civic value of caregiving as a service to citizens and the country contending that family immigration policies should be expanded to recognize the importance of caregiving duties for dependents This argument is part of a broader project in political theory and public policy aimed at reconciling civic republicanism with a feminist ethic of care and its emphasis on dependency work As a whole *Earned Citizenship* provides a non humanitarian justification for legalizing unauthorized immigrants based on their contributions to citizens and institutions in their adopted nation **Substance Abuse** David E. classification of drugs explains how drugs work in the body includes a general survey of both legal and illegal drugs and describes the methods of substance abuse prevention and treatment Readers receive a comprehensive introduction to the broad topic of substance abuse and a variety of additional resources with which to conduct extensive research In addition to describing the nature of licit and illicit drugs the beneficial and harmful effects drugs can have on the human body and factors that may lead to abuse and or substance abuse this book covers subtopics such as drug testing in a variety of settings including the workplace and sports drug control mechanisms and the debates relating to the legalization of drugs such as medical and recreational marijuana The book also offers primary source resources that enable readers to directly examine the text of documents such as significant laws and court cases dealing with aspects of substance abuse alcohol prohibition amendments the Controlled Substances Act of 1970 a series of memoranda from the U S Department of Justice regarding the prosecution of marijuana cases and state doctor shopping laws

**The National Security Constitution** Paul F Scott,2018-05-17 This book addresses the various ways in which modern approaches to the protection of national security have impacted upon the constitutional order of the United Kingdom It outlines and assesses the constitutional significance of the three primary elements of the United Kingdom s response to the possibility of terrorism and other phenomena that threaten the security of the state the body of counter terrorism legislation that has grown up in the last decade and a half the evolving law of investigatory powers and to the extent relevant to the domestic constitution the law and practice governing international military action and co operation Following on from this the author demonstrates that considerations of national security as a good to be protected and promoted in contemporary Britain are reflected not merely in the existence of discrete bodies of law by which it is protected at home and abroad but simultaneously and increasingly leaked into other areas of public law Elements of the constitution which are not directly and inherently linked to national security nevertheless become by both

accident and design implicated in the state's national security endeavours with significant and at times far reaching consequences for the constitutional order generally A renewed and strengthened concern for national security since September 2001 has it is argued dragged into its orbit a variety of constitutional phenomena and altered them in its image giving rise to what we might call a national security constitution

**Law, Ecology, and the Management of Complex Systems** Tiina Paloniitty, 2022-08-19 This book addresses the role of law in the adaptive management of socio ecological systems Recent years have witnessed a rise in discussion over the relation between adaptivity and law as if after decades of insouciance legal scholars have finally started to understand the impacts of the scientific paradigm called adaptive management on the legal sphere Even though the complicated relations between law and the adaptive management of socio ecological systems have become more debated a thorough examination of the scientific and theoretical fundamentals of such endeavours has yet to be presented Using the illustrative example of European Union water governance and its path toward embracing adaptive management this book emphasises the legal significance of properly understanding the manner in which scientific knowledge of the environment is produced Though always pivotal rigorously apprehending science is especially crucial when dealing with the management of complex ecosystems as the normative is created gradually before law begins to examine the facts of the matter After examining the roots of adaptive management this book argues that the legal needs to understand itself as an integral part of the process of the socio ecological management of complex systems and not merely an external umpire resolving disputes As a whole the book offers new insights into the EU regulator's approaches to scientific realities making it an interesting read not only to academics and legal scholars but also to regulators striving to deepen their understanding or pondering which approach to adopt in the face of new regulatory challenges and to scientists interested in the science and law aspects of their work

**Contours of the Nation** Deborah McPhail, 2017-10-31 The obesity epidemic that is said to plague nations around the world including Canada is not solely a medical condition to be managed In Canada the discourse on obesity emerged during a time of social upheaval in the postwar period *Contours of the Nation* is the first book which historically explores obesity in Canada from a critical perspective Deborah McPhail demonstrates how obesity as a problem was affixed to particular populations in order to separate true Canadians from others She reveals how the articulation of obesity contributed to the Canadian colonial project in the North where Indigenous peoples were viewed as modern Canadians due to their obesity thereby negating any special claims to northern lands *Contours of the Nation* successfully demonstrates how histories can trace the actual materialization of bodies through relations of power particularly those pertaining to race gender and nation
