The Regulation of Product Standards in World Trade Law Ming Du, 2020-11-12 This monograph has two central purposes The first is to provide a critical analysis of how governmental private and hybrid product standards are regulated in the GATT WTO legal framework The second purpose is to explore both positively and normatively the impact that WTO disciplines may have on the composition function and decision making process of various standard setting bodies through the lens of a series of selected case studies including the EU eco labelling scheme ISO standards and private standards such as the FSC The book analyses what role if any the WTO may play in making product standards applied in international trade embody not only technological superiority but also substantive and procedural fairness such as deliberation representativeness openness transparency due process and accountability Whilst it has been long recognised that voluntary product standards drawn up by both governmental and non governmental bodies can in practice create trade

European Dept., 2015-10-27 This paper discusses Serbia's Second Review Under the Stand by Arrangement SBA and Request for Waivers of Applicability of Performance Criteria PCs The economy of Serbia is gradually recovering from the 2014 recession supported by strong export performance coupled with a smaller than expected fall in consumption Inflation has remained below the National Bank of Serbia tolerance band due mainly to low imported inflation All end June PCs and indicative

targets were met with significant margins The IMF staff supports the authorities request for the completion of the Second Review under the SBA given the program performance so far and the policy commitments going forward The Political Economy of Energy Subsidy Reform Gabriela Inchauste, David G. Victor, 2017-03-22 This book proposes a simple framework for understanding the political economy of subsidy reform and applies it to four in depth country studies covering more than 30 distinct episodes of reform Five key lessons emerge First energy subsidies often follow a life cycle beginning as a way to stabilize prices and reduce exposure to price volatility for low income consumers However as they grow in size and political power they become entrenched Second subsidy reform strategies vary because the underlying political economy problems vary When benefits are concentrated satisfying or isolating interest groups with alternative policies is an important condition for effective reform When benefits are diffuse it can be much harder to identify and manage the political coalition needed for reform Third governments vary in their administrative and political capacities to implement difficult energy subsidy reforms Fourth improvements in social protection systems are often critical to the success of reforms because they make it possible to target assistance to those most in need Finally the most interesting cases involve governments that take a strategic approach to the challenges of political economy In these settings fixing energy subsidies is central to the governments missions of retaining political power and reorganizing how the government delivers benefits to the population These cases are examples of reform engineering where governments actively seek to create the capacity to implement alternative policies depoliticize tariffs and build credibility around alternative policies The most successful reforms involve active efforts by policy leaders to identify the political forces supporting energy subsidies and redirect or inoculate them
