What is a Mathematical Concept? Elizabeth de Freitas, Nathalie Sinclair, Alf Coles, 2017-06-22 Responding to widespread interest within cultural studies and social inquiry this book addresses the question what is a mathematical concept using a variety of vanguard theories in the humanities and posthumanities Tapping historical philosophical sociological and psychological perspectives each chapter explores the question of how mathematics comes to matter Of interest to scholars across the usual disciplinary divides this book tracks mathematics as a cultural activity drawing connections with empirical practice Unlike other books in this area it is highly interdisciplinary devoted to exploring the ontology of mathematics as it plays out in different contexts This book will appeal to scholars who are interested in particular mathematical habits creative diagramming structural mappings material agency interdisciplinary coverings that shed light on both mathematics and other disciplines Chapters are also relevant to social sciences and humanities scholars as each offers philosophical insight into mathematics and how we might live mathematically

The Armed Forces Covenant in action? Great Britain: Parliament: House of Commons: Defence Committee, 2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 3 5 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country

House of Commons - Culture, Media and Sport Committee: Supporting The Creative Economy - Volume I: HC 674 Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2013-09-26 This report warns that the extraordinary success of the UK s creative industries may be jeopardised by any dilution of intellectual property rights and the failure to tackle online piracy The Committee also strongly condemns the failure of Google in particular to tackle access of copyright infringing websites through its search engine Such illegal piracy combined with proposals arising from the Hargreaves review to introduce copyright exceptions and a failure to strengthen copyright enforcement as envisaged by the Digital Economy Act 2010 together threaten the livelihoods of the

individuals and industries that contribute over 36 billion annually to the UK economy Also the Olympics No Marketing Rights scheme is excessively restrictive and is preventing British creative companies from realising the benefits they deserve from the Olympic legacy The Committee calls for a central champion of Intellectual Property in Government to promote and protect the interests of UK intellectual property the maximum penalty for serious online IP theft to be increased to 10 years imprisonment in line with the punishment for such offences in the physical world more evidence and scrutiny before any exceptions to copyright such as those suggested by Hargreaves are applied redoubled efforts to ensure that the video games tax credit is approved by the European Commission and introduced as soon as possible reforms to the income tax and tax reliefs systems to recognise adequately the freelance nature of much creative work greater recognition of the importance of arts subjects in the curriculum

Seven Myths About Education Daisy Christodoulou, 2014-03-14 In this controversial new book Daisy Christodoulou offers a thought provoking critique of educational orthodoxy Drawing on her recent experience of teaching in challenging schools she shows through a wide range of examples and case studies just how much classroom practice contradicts basic scientific principles She examines seven widely held beliefs which are holding back pupils and teachers Facts prevent understanding Teacher led instruction is passive The 21st century fundamentally changes everything You can always just look it up We should teach transferable skills Projects and activities are the best way to learn Teaching knowledge is indoctrination In each accessible and engaging chapter Christodoulou sets out the theory of each myth considers its practical implications and shows the worrying prevalence of such practice Then she explains exactly why it is a myth with reference to the principles of modern cognitive science She builds a powerful case explaining how governments and educational

organisations around the world have let down teachers and pupils by promoting and even mandating evidence less theory and bad practice This blisteringly incisive and urgent text is essential reading for all teachers teacher training students policy makers head teachers researchers and academics around the world *Encouraging Learning* James Nottingham,2013-05-29 I recommend this book to anyone wishing to help children learn In it you will find some lovely ideas for improving the way we encourage support and praise all young people Professor Carol Dweck author of *Mindset* Stanford University USA James has developed a rare skill for blending arresting anecdotes hard edged research and practical advice into a truly compelling narrative Professor Barry Hymer author of the *Gifted and Talented Pocket Book* Cumbria University UK Over the last 20 years James Nottingham has studied how children learn He has taught every age group in both primary and secondary schools helped deaf teenagers deal with anger and isolation and even done philosophy with three year olds In this inspiring humorous and practical book he shows what you can do to help children of all ages develop into confident thoughtful and independent learners Based around the acronym ASK this book explores attitudes skills and knowledge to learning what is required and how to develop these skills more effectively It shows how to encourage independent thinking and a spirit of inquiry in your children Highlights include the dangers of calling our children clever bright and gifted the best ways to teach wisdom how to help children excel in exams why curiosity did not kill the cat With a foreword written by John Hattie *Encouraging Learning* draws on research from some of the most respected experts on thinking and learning to identify the best ways to help children learn more effectively efficiently and co operatively For everyone living or working with children particularly teachers parents carers and youth workers this book shows you some of the best ways to enhance children s learning including how to question praise and encourage more effectively **Educational Research for Social Justice** Alistair Ross,2021-06-22 This book presents a series of analyses of educational policies largely in the UK but some also in Europe researched by a team of social scientists who share a commitment to social justice and equity in education We explore what social justice means in educational policy and practice and how it impacts on our understanding of both educational science and the public good Using a social constructivist approach the book argues that social justice requires a particular and critical analysis of the meaning of meritocracy and of the way this term turns educational policies towards treating learning as a competition in which many young people are constructed as losers We discuss how many terms in education are essentialised and have specific and different meanings for particular social groups and how this may create issues in both quantitative survey methods and in determining what is the public good We discuss social justice across a range of intersecting social characteristics including social class ethnicity and gender as they are applied across the educational policy spectrum from early years to postgraduate education We examine the ways that young people construct their identities and the implications of this for understanding the public good in educational practice We consider the responsibilities of educational researchers to acknowledge these issues and offer examples of researching with such a

commitment We conclude by considering how educational policy might contribute to a socially just equitable and inclusive public good The Times Index ,2013-06 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Time educational supplement Scotland and the Times higher education supplement
