*Proceedings of the 12th International Conference on Computer Engineering and Networks* Qi Liu, Xiaodong Liu, Jieren Cheng, Tao Shen, Yuan Tian, 2022-10-19 This conference proceeding is a collection of the papers accepted by the CENet2022 the 12th International Conference on Computer Engineering and Networks held on November 4 7 2022 in Haikou China The topics focus but are not limited to Internet of Things and Smart Systems Artificial Intelligence and Applications Communication System Detection Analysis and Application and Medical Engineering and Information Systems Each part can be used as an excellent reference by industry practitioners university faculties research fellows and undergraduates as well as graduate students who need to build a knowledge base of the most current advances and state of practice in the topics covered by this conference proceedings This will enable them to produce maintain and manage systems with high levels of trustworthiness and complexity

**Applications of Microfluidic Systems in Biology and Medicine** Manabu

Tokeshi, 2024-10-02 This book is the second edition of the one originally published in 2016 which focused on state of the art microfluidic research in medical and biological applications Similar to the first edition beginners in the field undergraduates engineers biologists medical and pharmaceutical researchers will easily learn to understand microfluidic based medical and biological applications Because a wide range of topics is summarized here it also helps experts to learn more about fields outside their own specialties In this second edition significant revisions have been made to chapters covering technologies that have seen major advancements such as acoustofluidics protein crystallography organ on a chip systems nanopore sensing and paper based microfluidics In addition the chapters on cancer diagnosis using exosomes and single cell sequencing using droplet microfluidics which are attracting attention as new technologies have been newly added Readers will be convinced that microfluidic devices have great potential for medical and biological applications

Stochastic Models

in Reliability, Network Security and System Safety Quan-Lin Li, Jinting Wang, Hai-Bo Yu, 2019-10-21 This book is dedicated to Jinhua Cao on the occasion of his 80th birthday. Jinhua Cao is one of the most famous reliability theorists. His main contributions include published over 100 influential scientific papers, published an interesting reliability book in Chinese in 1986 which has greatly influenced the reliability of education, academic research and engineering applications in China, initiated and organized Reliability Professional Society of China, the first part of Operations Research Society of China since 1981. The high admiration that Professor Cao enjoys in the reliability community all over the world was witnessed by the enthusiastic response of each contributor in this book. The contributors are leading researchers with diverse research perspectives. The research areas of the book include a broad range of topics related to reliability models, queueing theory, manufacturing systems, supply chain, finance, risk management, Markov decision processes, blockchain and so forth. The book consists of a brief Preface describing the main achievements of Professor Cao, followed by congratulations from Professors Way Kuo and Wei Wayne Li, and by Operations Research Society of China and Reliability Professional Society of China, and further followed by 25 articles roughly grouped together. Most of the articles are written in a style understandable to a wide audience. This book is useful to anyone interested in recent developments in reliability, network security, system safety and their stochastic modeling and analysis.

**Explanatory Models, Unit Standards, and Personalized Learning in Educational Measurement** William P. Fisher Jr., Paula J. Massengill, 2022-10-15 The papers by Jack Stenner included in this book document the technical details of an art and science of measurement that creates new entrepreneurial business opportunities. Jack brought theory, instruments and data together in ways that are applicable not only in the context of a given test of reading or mathematics ability, but which more importantly catalyzed literacy and numeracy capital in new, fungible expressions. Though Jack did not reflect in writing on the inferential, constructive processes in which he engaged, much can be learned by reviewing his work with his accomplishments in mind. A Foreword by Stenner's colleague and co-author on multiple works, William P. Fisher Jr., provides key clues concerning how Jack's understanding of measurement and its values aligns with social and historical studies of science and technology and how recent developments in collaborations of psychometricians and metrologists are building on and expanding Jack's accomplishments. This is an open access book.

*Proceedings of the International Conference on Eco-friendly Fibers and Polymeric Materials* Sanjay Mavinkere Rangappa, Sathish Kumar Palaniappan, Suchart Siengchin, 2024-11-26 This proceedings book contains papers presented at the International Conference on Eco-friendly Fibers and Polymeric Materials (LSPM23) held on EFPM 2024, 19-20 February, Bangkok, Thailand. The papers in this book are presented by academics and industrial practitioners showcasing the latest technological advancements and applications of environmentally friendly polymeric materials, with an emphasis on the production of bio-based fibers and polymers, greatly enlarging its range of applications in different industrial sectors, including automobiles, sports, architecture design and many others. The content of this book appeals to academia and
