**"Science, Technology, and Utopias "** Christine

Filippone, 2017-07-05 The rise of proxy wars the Space Race and cybernetics during the Cold War marked science and technology as vital sites of social and political power Women artists historically excluded from these domains responded critically while simultaneously redeploying the products of Technological Society into works that promoted ideals of progress and alternative concepts of human community In this innovative book author Christine Filippone offers the first focused examination of the conceptual use of science and technology by women artists during and just after the women s movement She argues that artists Alice Aycock Agnes Denes Martha Rosler and Carolee Schneemann used science and technology to mount a critique on Cold War American society as they saw it conservative and constricting Motivated by the contemporary American Women s Movement these artists transformed science and technology into new modes of artmaking that transgressed modernist heroic painterly styles and subverted the traditional economic structures of the gallery the museum and the dealer At the same time the artists also embraced these domains of knowledge and practice as expressions of hope for a better future Many found inspiration in the scientific theory of open systems which investigated problems of wholeness dynamic interaction and organization enabling consideration of the porous boundaries between human bodies and their social political and nonhuman environments Filippone also establishes that the theory of open systems not only informed

feminist art but also continued to influence women artists practice of reclamation and ecological art through the twenty first century *El-Hi Textbooks & Serials in Print*, 2003 ,2003      **Water, Food and Poverty in River Basins** Myles Fisher, Simon Cook, 2013-09-13 Conventional wisdom says that the world is heading for a major water crisis By 2050 global population will increase from 7 billion to a staggering 9 5 billion and the demands this will place on food and water systems will inevitably push river basins over the edge The findings from this book present a different picture While it is convenient to visualize an inevitable global water and food crisis in which increasing demands result in increasing poverty food insecurity and conflict the reality is far more nuanced and revolves around the politics of equitable and sustainable development of resources The first part of this book provides detailed insight into conditions of water flows within nine river basins In the second part authors summarize and re analyze the outcome of the nine basins providing a coherent global picture of water water productivity and development They assess the impacts of variations of these attributes on development and approaches for poverty alleviation and explore the institutional factors that support or obstruct change How people will manage river systems while protecting vital ecosystem functions will make the difference between catastrophe and survival As Prof Asit Biswas points out the world is facing a water crisis not because of physical scarcity of water but because of poor management practices in nearly all countries of the world The book is based on the four years 2006 2010 of extensive research into the state of ten of the world s major river basins carried out under the CGIAR Challenge Program for Water and Food s Basin Focal Project This book was published as a special issue of *Water International*      **Nurturing Readiness in Early Childhood Education** Ellen Cromwell, 2000 This second edition text is a conceptual and practical guide to creating a whole child curriculum organized into three parts Child Development The PLAN Curriculum and The Environment Featuring the author s PLAN model Play Learning the Arts and Nurturing this early childhood curriculum system effectively connects and integrates theory philosophy and practice and advocates an open interactive child centered environment The PLAN environment is particularly appropriate for the diverse needs of all children in early childhood settings The text also focuses on the role and responsibilities of teachers in nurturing learning establishing values and addressing the full needs of the child      **Becoming Literate in Mathematics and Science** , 2001      **Holt Science and Technology** Holt Rinehart & Winston, 2004-02      Science Spectrum Holt Rinehart & Winston, Holt, Rinehart and Winston Staff, 2003-03      *Managing the Environment, Managing Ourselves* Richard N. L. Andrews, 1999-01-01 Offers a history of American environmental policy beginning with the age of European exploration in 1487 and continuing through 1996      **Environmental Health** Howard Frumkin, 2016-02-09 The bestselling environmental health text with all new coverage of key topics Environmental Health From Global to Local is a comprehensive introduction to the subject and a contemporary authoritative text for students of public health environmental health preventive medicine community health and environmental studies Edited by the former director of the CDC s National Center for Environmental Health and current dean of the School of Public Health at the

University of Washington this book provides a multi faceted view of the topic and how it affects different regions populations and professions In addition to traditional environmental health topics air water chemical toxins radiation pest control it offers remarkably broad cross cutting coverage including such topics as building design urban and regional planning energy transportation disaster preparedness and response climate change and environmental psychology This new third edition maintains its strong grounding in evidence and has been revised for greater readability with new coverage of ecology sustainability and vulnerable populations with integrated coverage of policy issues and with a more global focus Environmental health is a critically important topic and it reaches into fields as diverse as communications technology regulatory policy medicine and law This book is a well rounded guide that addresses the field s most pressing concerns with a practical bent that takes the material beyond theory Explore the cross discipline manifestations of environmental health Understand the global ramifications of population and climate change Learn how environmental issues affect health and well being closer to home Discover how different fields incorporate environmental health perspectives The first law of ecology reminds is that everything is connected to everything else Each piece of the system affects the whole and the whole must sustain us all for the long term Environmental Health lays out the facts makes the connections and demonstrates the importance of these crucial issues to human health and well being both on a global scale and in our homes workplaces and neighborhoods      *Holt Science and Technology* Holt Rinehart & Winston,Holt, Rinehart and Winston Staff,2004
