**6-3 Conditions for Parallelograms**

You can use the following conditions to determine whether a quadrilateral such as  $PQRS$  is a parallelogram.

| Conditions for Parallelograms                                                                                                     |                                                                                                           |  |                                                                            |
|-----------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|--|----------------------------------------------------------------------------|
|                                                                                                                                   | $\overline{QR} \parallel \overline{SP}$<br>$\overline{QR} \cong \overline{SP}$                            |  | $\overline{QR} \cong \overline{SP}$<br>$\overline{PQ} \cong \overline{RS}$ |
| <p>If one pair of opposite sides is <math>\parallel</math> and <math>\cong</math>, then <math>PQRS</math> is a parallelogram.</p> | <p>If both pairs of opposite sides are <math>\cong</math>, then <math>PQRS</math> is a parallelogram.</p> |  | $\angle P \cong \angle R$<br>$\angle Q \cong \angle S$                     |
| <p>If both pairs of opposite angles are <math>\cong</math>, then <math>PQRS</math> is a parallelogram.</p>                        | <p>If the diagonals bisect each other, then <math>PQRS</math> is a parallelogram.</p>                     |  | $\overline{PT} \cong \overline{RT}$<br>$\overline{QT} \cong \overline{ST}$ |

A quadrilateral is also a parallelogram if one of the angles is supplementary to both of its consecutive angles.

$65^\circ + 115^\circ = 180^\circ$ , so  $\angle A$  is supplementary to  $\angle B$  and  $\angle D$ .

Therefore,  $ABCD$  is a parallelogram.

Show that each quadrilateral is a parallelogram for the given values. Explain.
