A People's Curriculum for the Earth is a collection of articles, role plays, simulations, stories, poems, and graphics to help breathe life into teaching about the environmental crisis. The book features some of the best articles from Rethinking Schools magazine alongside classroom-friendly readings on climate change, energy, water, food, and pollution, as well as on people who are working to make things better. A People's Curriculum for the Earth has the breadth and depth of Rethinking Globalization: Teaching for Justice in an Unjust World, one of the most popular books we've published. At a time when it's becoming increasingly obvious that life on Earth is at risk, here is a resource that helps students see what's wrong and imagine solutions. Praise for A People's Curriculum for the Earth: To really confront the climate crisis, we need to think differently, build differently, and teach differently. A People's Curriculum for the Earth is an educator's toolkit for our times. Naomi Klein, author of *The Shock Doctrine* and *This Changes Everything: Capitalism vs. the Climate*. This volume is a marvelous example of justice in ALL facets of our lives: civil, social, educational, economic, and yes, environmental. Bravo to the Rethinking Schools team for pulling this collection together and making us think more holistically about what we mean when we talk about justice. Gloria Ladson Billings, Kellner Family Chair in Urban Education, University of Wisconsin-Madison. Bigelow and Swinehart have created a critical resource for today's young people about humanity's responsibility for the Earth. This book can engender the shift in perspective so needed at this point on the clock of the universe. Gregory Smith, Professor of Education, Lewis Clark College, co-author with David Sobel of *Place and Community-based Education in Schools*.

American Egyptologist Jeffrey Abt, 2012-05-01

James Henry Breasted (1865-1935) had a career that epitomizes our popular image of the archaeologist: Daring, handsome, and charismatic, he traveled on expeditions to remote and politically unstable corners of the Middle East, helped identify the tomb of King Tut, and was on the cover of *Time* magazine. But Breasted was more than an Indiana Jones; he was an accomplished scholar, academic, entrepreneur, and talented author who brought ancient history to life not just for students but for such notables as Teddy Roosevelt and Sigmund Freud. In *American Egyptologist*, Jeffrey Abt weaves together the disparate strands of Breasted's life from his small-town origins following the Civil War to his evolution into the father of American Egyptology and the founder of the Oriental Institute in the early years of the University of Chicago. Abt explores the scholarly, philanthropic, diplomatic, and religious contexts of his ideas and projects, providing insight into the origins of America's most prominent center for Near Eastern archaeology. An illuminating portrait of the nearly forgotten man who demystified ancient Egypt for the general public, *American Egyptologist* restores James Henry Breasted to the world and puts forward a brilliant case for his place as one of the most important scholars of modern times.

The Patchwork of World History in Texas High Schools Stephen Jackson,2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States
