Sequence Stratigraphy of Siliciclastic Systems Vitor Abreu,2010 The stratigraphic concept of a depositional sequence was introduced to the scientific literature by Exxon Production Research Company EPRco in the late 70s building on the shoulders of giants like Chamberlain Sloss and Wheeler Since then several papers compared and contrasted the original Exxon and later ExxonMobil sequence stratigraphic school with other approaches to subdivide the geologic record as well as debating the ExxonMobil model validity and impact on the community At its core the Exxon Mobil gmodel h is really a stratigraphic interpretation method which was never explicitly documented in the literature The objective of this book is to present the ExxonMobil sequence stratigraphic method in its current form in an attempt to clarify its usage and application in diverse geologic data and depositional environments This publication is the result of more than 3 decades of sequence stratigraphy research and application at EPRco and at the ExxonMobil Upstream Research Company URC The objective is to emphasize the most important aspects of Sequence Stratigraphy a method to guide geologic interpretation of stratigraphic data seismic profiles welllogs cores and outcrops across scales from local to regional and global and depositional environments from continental to deep marine from the SEPM website

Research on Physics Education E.F. Redish,M. Vicentini,2004-08-09 Physics Education research is a young field with a strong tradition in many countries However it has only recently received full recognition of its specificity and relevance for the growth and improvement of the culture of Physics in contemporary Society for different levels and populations This may be due on one side to the fact that teaching

therefore education is part of the job of university researchers and it has often been implicitly assumed that the competences required for good research activity also guarantee good teaching practice On the other side and perhaps more important is the fact that the problems to be afforded in doing research in education are complex problems that require a knowledge base not restricted to the disciplinary physics knowledge but enlarged to include cognitive science communication science history and philosophy The topics discussed here look at some of the facets of the problem by considering the interplay of the development of cognitive models for learning Physics with some reflections on the Physics contents for contemporary and future society with the analysis of teaching strategies and the role of experiments the issue of assessment and cultural aspects Information is also given on the organizations involved in connecting various aspects of Physics Education the International Commission on Physics Education the European Physical Society and the European Physics Education Network
