Introduction To Comparative Law Zweigert 1998 :

A New Introduction to Comparative Law Jaakko Husa, 2015-05-28 This thought provoking introduction to the study of comparative law provides in depth analyses of all major comparative methodologies and theories and serves as a common sense guide to the study of foreign legal systems It is written in a lively and accessible style and will prove indispensable reading to students of the subject It also contains much that will be of interest to comparative law scholars offering novel insights into commonplace methodological and theoretical questions and making a significant contribution to the field

The Oxford Handbook of Comparative Law Mathias Reimann, Reinhard Zimmermann, 2019-03-26 This fully revised and updated second edition of *The Oxford Handbook of Comparative Law* provides a wide ranging and diverse critical survey of comparative law at the beginning of the twenty first century It summarizes and evaluates a discipline that is time honoured but not easily understood in all its dimensions In the current era of globalization this discipline is more relevant than ever both on the academic and on the practical level The Handbook is divided into three main sections Section I surveys how comparative law has developed and where it stands today in various parts of the world This includes not only traditional model jurisdictions such as France Germany and the United States but also other regions like Eastern Europe East Asia and Latin America Section II then discusses the major approaches to comparative law its methods goals and its relationship with other fields such as legal history economics and linguistics Finally section III deals with the status of comparative studies in over a dozen subject matter areas including the major categories of private economic public and criminal law The Handbook contains forty eight chapters written by experts from around the world The aim of each chapter is to provide an accessible original and critical account of the current state of comparative law in its respective area which will help to shape the agenda in the years to come Each chapter also includes a short bibliography referencing the definitive works in the field

Comparative Law Fernanda G. Nicola, G nter Frankenberg, 2024-08-06 This book provides a practical introductory guide to comparative law Fernanda G Nicola and G nter Frankenberg present and examine conventional and critical approaches to legal comparison exploring its ramifications in the field and political effects *An introduction to comparative law* Konrad Zweigert, 1998 **Law and Language** Michael D. A. Freeman, Fiona Smith, 2013-02-21 Offers a broad overview of the interaction between law and language and the way they influence each other Contains papers from the 15th annual interdisciplinary colloquium held in the Law School of UCL in July 2011 *International Intellectual Property Arbitration* Trevor Cook, Trevor M. Cook, Alejandro I. Garcia, 2010-01-01 More and more intellectual property disputes tend to be multijurisdictional in nature and parties everywhere are turning to international arbitration as the most promising means of resolution Although these two legal specialisms intellectual *Comparative Law as Critique* G nter Frankenberg, 2016-04-29 Presenting a critique of conventional methods in comparative law this book argues that for comparative law to qualify as a discipline comparatists must reflect on how and why they make comparisons G nter

Frankenberg discusses not only methods and theories but also the ethical implications and the politics of comparative law in bringing out the different dimensions of the discipline Comparative Law as Critique offers various approaches that turn against the academic discourse of comparative law including analysis of a widespread spirit of innocence in terms of method and critique of human rights narratives It also examines how courts negotiate differences between cases regarding Muslim veiling The incisive critiques and comparisons in this book will be of essential reading for comparatists working in legal education and research as well as students of comparative law and scholars in comparative anthropology and social sciences

Precedent and Statute Orlin Yalnazov, 2018-11-02 Should laws be made in courts or in parliaments Orlin Yalnazov proposes a new approach to the problem He conceptualizes law as an information product and law making as an exercise in production Law making has inputs and outputs and technology is used to transform one into the other Law may depending on input and technology take on different forms it can be vague or it can be certain The technologies between which we may choose are precedent and statute Differences between the two being sizeable our choice has significant repercussions for the cost of the input and the form of the output The author applies this framework to several problems including the comparison between the common and the civil law comparative civil procedure and EU law Perhaps most critically he offers a critique of the efficiency of the common law hypothesis

Comparative Law and Legal Traditions George Mousourakis, 2019-11-01 The primary aim of this book is to provide clear and reliable information on a number of central topics in comparative law At a time when global society is increasingly mobile and legal life is internationalized the role of comparative law is gaining importance While the growing interest in this field may well be attributed to the dramatic increase in international legal transactions this empirical parameter is only part of the explanation The other part and at least equally important has to do with the expectation of gaining a deeper understanding of law as a social phenomenon and a fresh insight into the current state and future direction of one's own legal system In response to the internationalization of legal practice and theory law schools around the world have expanded their comparative law programs Within the legal subjects that form the core of the curriculum there is a greater interest in comparative legal analysis as well as greater attention to how global developments and international actors and institutions affect domestic law Transnational legal education based on comparative reasoning is intended to help shape a new generation of lawyers public servants and other professionals who recognize and respect cultural diversity in an interconnected world The central topics discussed in this book include the nature and scope of comparative legal inquiries the relationship of comparative law to other fields of legal study the aims and uses of comparative law the origins and historical development of comparative law and the evolution and defining features of some of the world's predominant legal traditions It also deals with selected theoretical aspects such as the problem of comparability of legal events the classification of legal systems into families of law and the topics of legal transplants harmonization and convergence of laws Chiefly intended for students the book also discusses a number of fundamental issues concerning the

development of comparative law and devotes certain sections to reviewing the salient features of the relevant literature on definitional terminological methodological and historical issues Environmental Law Across Cultures Kirk W.

Junker, 2019-12-09 This book provides a practical functional comparison among various institutions tools implementation practices and norms in environmental law across legal cultures This is a new approach that focuses on the act of comparison looking at legal practice from the ground up including the perspective of citizens Most literature on comparative environmental law either focuses on a two way comparison of state jurisdictions or simply juxtaposes environmental features of two or more state jurisdictions without engaging in any analysis of the comparison However this book treats legal cultures as the objects of comparison as it provides practical comparisons among various institutions tools and norms in environmental law The arrangement and organisation of the material reverses the more traditional presentation of comparative environmental law as a series of countries within which separate descriptions are respectively presented In this book the reader is presented with environmental legal themes with examples and case studies drawn from various cultures that are compared in order to help understand the theme Case studies draw on the authors experiences in a range of legal cultures including in Australia Brazil China Chile Ethiopia Germany India Nigeria Slovakia and the USA The comparative nature of the book allows domestic professionals to develop skills to enable them to understand and advocate broader contexts for clients and helps students become more aware of specific legal systems while questioning why their own system functions or does not function as it does The book is aimed at advanced undergraduate and postgraduate students of environmental law as well as researchers and practitioners
