Social Implications of Research in Higher Education Mdikana, Andile Alfred, 2025-05-29 Traditional research assumes a singular almost absolutist approach to knowledge In contrast critical theory challenges the positivist outlook on scientific research and assumes a more socio cultural outlook on the social world In specific terms critical research examines the nature of power dynamics influencing the social world More broadly this has implications for understanding inequality and disparity across cleavages of race gender ethnicity sexual orientation and economic class among other differences in identity Furthermore rather than simply acknowledging the subjective nature of the social world

critical research calls for fundamentally transforming perceptions and attitudes in a manner that views marginalized populations more equitably Social Implications of Research in Higher Education examines the social implications of research confounded by culturally reinforced presumptions such as stereotypes and other biases that privilege those in power It analyzes research aimed at benefiting marginalized or oppressed populations who lack the same opportunities and benefits that are otherwise granted to those in mainstream society Covering topics such as service learning university community engagement and research translation this book is an excellent resource for social justice advocates sociologists researchers professionals scholars academicians and more Handbook of Mixed Methods in Social & Behavioral Research Abbas Tashakkori, Charles Teddlie, 2003 The Handbook contains a gold mine of articles by leading scholars on what has come to be known as the third methodological movement in social research Aimed at surveying the differing viewpoints and disciplinary approaches of mixed methods this breakthrough book examines mixed methods from the research enterprise to paradigmatic issues to application The book also discusses the strengths and weaknesses of mixed methods designs and provides an array of specific examples in a variety of disciplines from psychology to nursing The book closes with a brief section on how to teach and perform collaborative research using a mixed methods research design Written so that it can be used either as a pedagogical tool or as a reference for researchers the book is rich in examples and includes a glossary easy to follow diagrams and tables to help readers become more familiar with the language and controversies in this evolving area

Social Relations and the Cuban Health Miracle Elizabeth Kath, 2011-12-31 For Cuba's supporters health is the most commonly cited evidence of the socialist system's success Even critics often concede that this is the country's saving grace Cuba's health statistics are indeed extraordinary This small island outperforms virtually all of its neighboring countries and all countries of the same level of economic development Some of its health statistics rival wealthy industrialized countries Moreover these health outcomes have resulted against all odds Setting out to unravel this puzzle the author finds that Cuba possesses an unusually high level of popular participation and cooperation in the implementation of health policy This has been achieved with the help of a longstanding government that prioritizes public health and has enough political influence to compel the rest of the community to do the same On the other hand popular participation in decision making regarding health policy is minimal which contrasts with the image of popular participation often promoted Political elites design and impose health policy allowing little room for other health sector groups to meaningfully contribute to or protest official decisions This is a problem because aspects of health care that are important to those who use the system or work within it can be neglected if they do not fit within official priorities The author remains overall supportive of health achievement in Cuba The country's preventive arrangements its collective prioritization of key health areas the improvements in public access to health services through the expansion of health facilities and the provision of free universal care are among the accomplishments that set it apart The sustainability and progress of these achievements however must involve open

recognition and public discussion of weaker aspects of the health system Doing Events Research Dorothy Fox, Mary Beth Gouthro, Yeganeh Morakabati, John Brackstone, 2014-04-03 Events Management is a rapidly expanding discipline with growing student numbers however currently there are no specifically focused Research Methods texts available to serve this growing cohort Fulfilling the need for a relevant book which reflects the unique characteristics of research in the field this title provides students with innovative ideas and inspiration to undertake their own research work and informs them of the wide diversity of research strategies and contexts that are available Content is written from a researcher's point of view and provides a step by step guide to accomplishing a project or dissertation in the field of events The reader is guided right from the beginning in selecting a topic for research identifying aims objectives and questions and then determining which research methods are the most appropriate and practical They are then shown how to analyze and interpret their data as well as writing up the project Whilst many current texts are skewed either towards qualitative or quantitative methods Doing Events Research provides a balanced coverage of both It incorporates not only traditional research methods but also contemporary techniques such as using social networking websites and Google analytics Specific research case studies are integrated to make applications accessible to events students and show the unique characteristics of researching in this field A range of useful learning aids spur critical thinking and further students knowledge This book is visually accessible and whilst written in an engaging style nonetheless maintains academic rigor grounded in research and scholarship This is essential reading for all events students Breakdown in Pakistan Masooda Bano, 2012-04-25 Thirty percent of foreign development aid is channeled through NGOs or community based organizations to improve service delivery to the poor build social capital and establish democracy in developing nations However growing evidence suggests that aid often erodes rather than promotes cooperation within developing nations This book presents a rare micro level account of the complex decision making processes that bring individuals together to form collective action platforms It then examines why aid often breaks down the very institutions for collective action that it aims to promote Breakdown in Pakistan identifies concrete measures to check the erosion of cooperation in foreign aid scenarios Pakistan is one of the largest recipients of international development aid and therefore the empirical details presented are particularly relevant for policy The book's argument is equally applicable to a number of other developing countries and has important implications for recent discussions within the field of economics **The Church in Relation to the World** Ch. Albert Jan Stam, 2008 **Designing E-Business Systems. Markets, Services, and Networks** Christof Weinhardt, Stefan Luckner, Jochen Stößer, 2009-08-03 Constitutes the proceedings of the 7th Workshop on E Business WEB 2008 held in Paris France on December 13 2008 This book covers topics such as electronic markets electronic services radio frequency identification service oriented architectures virtual communities and Web intelligence **Entrepreneurship in the Public Sector** Fabian Elias Diefenbach, 2011-08-31 Fabian E Diefenbach conceptually and empirically investigates entrepreneurship in public sector organizations His analyses identify

five drivers of entrepreneurship and show a positive effect of entrepreneurship on value creation
