Baethmann, Konstantin-A. Hossmann, Toshihiko Kuroiwa, Anthony Marmarou, Hans-J. Reulen, Kintomo Takakura, 2012-12-06

The first international symposium on brain edema was held in Vienna Austria in 1965 followed by altogether eight meetings since The most recent was organized in Yokohama by the Department of Neurosurgery of the Musashino Red Cross Hospital Tokyo The continuing interest of both clinicians and experimental scientists alike may be attributable to the fact that brain edema is a common denominator of many cerebral disorders which under acute conditions threatens life and well being of afflicted patients Although progress in understanding as well as treatment can be recognized since 1965 many problems remain particularly concerning the control of brain edema under acute conditions as in trauma or ischemia A quantum leap was the distinction of the cytotoxic and vasogenic brain edema prototypes as advanced by Igor Klatzo providing for transition from a morphological to functional understanding now The recent brain edema meetings were certainly benefiting from developments of both molecular neurobiology on the one hand side and functional brain imaging at an ever increasing resolution on the other such as magnetic resonance imaging or positron emission tomography The international symposium in San Diego 1996 may witness further breakthroughs hopefully also of effective treatment modalities The symposium in Yokohama was dedicated to the Legacy of 28 Years of Brain Edema Research as a reminder of accomplishments as well as remaining challenges
