The 100T-MS is an endpoint that includes a methane sensor used to detect, record, and transmit methane levels and alarms to a 100 Series collector or repeater.

## To Install the Endpoint

1. Attach the endpoint mounting bracket to the wall or pipe and use the bracket leveling feature to ensure it is level.
2. Attach the endpoint to the mounting bracket using the screws provided.
3. Cover the screws with the tamper caps.
4. Using an FC300 radio put the endpoint into Run mode.
5. Verify that methane level messages for the particular endpoint ID are being received at the head end application.

## Troubleshooting

If methane level messages are not being received, check the following:

- The Endpoint is in Run mode
- The CCU or repeater is installed within range of the endpoint is powered.
- The head end application is connected to the correct database that contains the endpoint data.

## Service

The endpoint contains a non-serviceable lifetime battery. If the unit fails, please return to Itron for repair/replacement.

## Compliance Statement

This device complies with Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference that may cause undesirable operation.

This device must be permanently mounted such that it retains a distance of 20 centimeters (7.9 inches) from all persons in order to comply with FCC RF exposure levels. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio or TV technician for help.

### Warning

**ELECTROMAGNETIC COMPATIBILITY**  
Use only approved accessories with this equipment. Unapproved modifications or operation beyond or in conflict with these instructions for use may void authorization by the authorities to operate the equipment.

TRON Project 1989 Ken Sakamura,2012-12-06 It is almost six years since the inauguration of the TRON project a concept first proposed by Dr K Sakamura of the University of Tokyo and it is almost 2 years since the foundation of the TRON Association on March 1988 The number of regular member companies registered in the TRON Association as of November 1988 is 145 which is a new record for the Association Some of this year's major activities that I would particularly like to mention are Over 50 TRON project related products have been or are about to be introduced to the marketplace according to a preliminary report from the Future Study Committee of the TRON Association In particular I am happy to say that the ITRON subproject which is ahead of the other subprojects has progressed so far that several papers on ITRON applications will be presented at this conference which means that the ITRON specifications are now ready for application to embedded commercial and industrial products

**TRON Project 1990** Ken Sakamura,2012-12-06 I wish to extend my warm greetings to you all on behalf of the TRON Association on this occasion of the Seventh International TRON Project Symposium The TRON Project was proposed by Dr Ken Sakamura of the University of Tokyo with the aim of designing a new comprehensive computer architecture that is open to worldwide use Already more than six years have passed since the project was put in motion The TRON Association is now made up of over 140 companies and organizations including 25 overseas firms or their affiliates A basic goal of TRON Project activities is to offer the world a human oriented computer culture that will lead to a richer and more fulfilling life for people throughout the world It is our desire to bring to reality a new order in the world of computers based on design concepts that consider the needs of human beings first of all and to enable people to enjoy the full benefits of these computers in their daily life Thanks to the efforts of Association members in recent months a number of TRON specification 32 bit microprocessors have been made available ITRON specification products are continuing to appear and we are now seeing commercial implementations of BTRON specifications as well The CTRON subproject meanwhile is promoting standardization through validation testing and a portability experiment and products are being marketed by several firms This is truly a year in which the TRON Project has reached the practical implementation stage

**Embedded Software Development** Ivan Cibrario Bertolotti,Tingting Hu,2017-12-19 Embedded Software Development The Open Source Approach delivers a practical introduction to embedded software development with a focus on open source components This programmer centric book is written in a way that enables even novice practitioners to grasp the development process as a whole Incorporating real code fragments and explicit real world open source operating system references in particular FreeRTOS throughout the text Defines the role and purpose of embedded systems describing their internal structure and interfacing with software development tools Examines the inner workings of the GNU compiler collection GCC based software development system or in other words toolchain Presents software execution models that can be adopted profitably to model and express concurrency Addresses the basic nomenclature models and concepts related to task based scheduling

algorithms Shows how an open source protocol stack can be integrated in an embedded system and interfaced with other software components Analyzes the main components of the FreeRTOS Application Programming Interface API detailing the implementation of key operating system concepts Discusses advanced topics such as formal verification model checking runtime checks memory corruption security and dependability Embedded Software Development The Open Source Approach capitalizes on the authors extensive research on real time operating systems and communications used in embedded applications often carried out in strict cooperation with industry Thus the book serves as a springboard for further research

**TRON Project 1987 Open-Architecture Computer Systems** Ken Sakamura,2012-12-06 Almost 4 years have elapsed since Dr Ken Sakamura of The University of Tokyo first proposed the TRON the realtime operating system nucleus concept and 18 months since the foundation of the TRON Association on 16 June 1986 Members of the Association from Japan and overseas currently exceed 80 corporations The TRON concept as advocated by Dr Ken Sakamura is concerned with the problem of interaction between man and the computer the man machine inter face which had not previously been given a great deal of attention Dr Sakamura has gone back to basics to create a new and complete cultural environment relative to computers and envisage a role for computers which will truly benefit mankind This concept has indeed caused a stir in the computer field The scope of the research work involved was initially regarded as being so extensive and diverse that the completion of activities was scheduled for the 1990s However I am happy to note that the enthusiasm expressed by individuals and organizations both within and outside Japan has permitted acceleration of the research and development activities It is to be hoped that the presentations of the Third TRON Project Symposium will further the progress toward the creation of a computer environment that will be compatible with the aspirations of mankind **Official Gazette of the**

**Retail Refrigeration** Judith A. Evans,Alan M. Foster,2016-01-19 Carbon emissions from the retail segment of the food cold chain are relatively high compared to other parts of the food cold chain Studies have also shown that food temperature is less well controlled at the retail and consumer end of the cold chain There is therefore considerable potential to optimize performance of refrigerated display cabinets and the refrigeration systems that are used to operate them to reduce carbon

emissions and to improve food temperature control Sustainable Retail Refrigeration draws together world experts on retail refrigeration In a single resource the authors cover the latest technologies and best current knowledge in the field With increasing concerns about energy use and global warming gasses retailers are increasingly being called to account for their actions Sustainable Retail Refrigeration is a valuable reference to manufacturers managers and policy makers incorporating both a design and an operational perspective *Oh's Intensive Care Manual E-Book* Andrew D Bersten, Neil Soni, 2008-12-05

**Visual Computing** Tosiya L. Kunii, 2013-04-17 This volume presents the proceedings of the 10th International Conference of the Computer Graphics Society CG International 92 Visual Computing Integrating Computer Graphics with Computer Vision held at Kogakuin

University Tokyo in Japan from June 22-26, 1992. Since its foundation in 1983, this conference has continued to attract high quality research articles in all aspects of computer graphics and its applications. Previous conferences in this series were held in Japan (1983, 1987), in Switzerland (1988), in the United Kingdom (1989), in Singapore (1990), and in the United States of America (1991). Future CG International conferences are planned in Switzerland (1993), in Australia (1994), and in the United Kingdom (1995). It has been the editor's dream to research the integration of computer graphics with computer vision through data structures. The conference the editor put together in Los Angeles in 1975, involving the UCLA and IEEE Computer Societies, had to spell out these three areas explicitly in the conference title: computer graphics, pattern recognition, and data structures, as well as in the title of the proceedings published by IEEE Computer Society Press. In 1985, the editor gave the name visual computer to machines having all the three functionalities as seen in the journal under that name from Springer. Finally, the research in integrating visual information processing has now reached reality, as seen in this proceedings of CG International 92. Chapters on virtual reality and on tools and environments provide examples.

*Oh's Intensive Care Manual* Andrew D. Bersten, Neil Soni, 2009-01-01. The sixth edition provides practical, concise information on all aspects of intensive care. Written in a clear and accessible style and now for the first time presented in colour throughout, this book enables the user to manage a patient in an ICU setting effectively without recourse to large text reference works or specialized monographs. This thoroughly revised and updated edition reflects the best and most current practice from leading centres in Australia, the UK, and Western Europe. Information on management and treatment of conditions is balanced by pathophysiological and pharmacological background. This is not just a cook book of procedures; it provides all of the essential information for candidates wishing to pass professional examinations. Addition of colour throughout to highlight summary boxes, tables, charts, and flow diagrams will make key information more accessible, easier, and faster to retrieve. Pitfalls in treatment and management emphasized in each chapter. Provides the user with expert advice on practical issues that will be encountered on a day-to-day basis in the ICU. Keeps the user abreast of the latest developments in diagnosis and management.
