

Category 2 Implement Hitch Dimensions

The 3-point hitch on your tractor is normally equipped to attach directly to a category 2 implement.

Before attaching a category 1 implement to the 3-point hitch, install bushings in the draft link attaching holes to accommodate the smaller 7/8-inch diameter hitch pins. See your John Deere dealer for these adapting parts.

POSITIONING SWAY BLOCKS

Sway blocks control 3-point hitch and implement side motion. The words "LEFT" and "RIGHT" on the two blocks indicate the proper side of the tractor drawbar support to which each is attached.

Before attaching an implement to the 3-point hitch, make sure the sway blocks are installed properly. Refer to the implement operator's manual for proper sway block location.

If a category 1 implement is to be attached, each sway block is installed with the wide flat surface facing the drawbar support.

If a category 2 implement is to be attached, each sway block is installed with the narrow flat edge facing the drawbar support.

The sway blocks can be installed in two positions for each implement category. When they are installed downward, along the sides of the drawbar support, they will eliminate implement side sway, whether the implement is in working position or in transport position. For some implements it will be necessary to install sway block shims, available from your dealer, between the sway blocks and the tractor drawbar support. Use the shims when the sway blocks are in the down position only.

Sway Blocks Installed to Eliminate Side Sway

When the sway blocks are pivoted upward, they eliminate side sway when the implement is raised for transport but permit it to sway when the implement is working.

Sway Blocks in Upper Position to Permit Side Sway When Implement Is Working (Category 2 Implement)
