Developing Early Maths Skills Outdoors Marianne Sargent, 2020-01-09 Developing Early Maths Skills Outdoors provides practitioners with practical planning for how to develop and enhance the outdoor area to facilitate mathematical learning. It includes up to 80 activities to embed each learning experience into daily provision with dedicated plans to develop specific skills and aspects of mathematics. The activities throughout the book are low cost and easy to set up, aiming to reassure practitioners and give them the confidence to plan more mathematical learning experiences outdoors. This is further supported with planning guidance and resource ideas as well as advice on observation and assessment, including suggestions for how to reduce the paperwork burden and a useful observation template. The book is divided into sections that represent the different aspects of mathematics and includes an introduction to each aspect explaining why it is important and outlining the fundamental skills and concepts that underpin it. Ideas for adult-led and adult-initiated activities that aim to develop children's early mathematical knowledge, skills, and understanding are suggested, along with suggestions for how to enhance continuous outdoor provision so that it promotes independent investigation, fostering creative and critical thinking. Pointers and tips about teaching mathematics in the early years, ideas for how to involve parents and carers, and links to all four British early years curriculum frameworks.

Treating Complex Trauma Mary Jo Barrett, Linda Stone Fish, 2014-05-30 In *Treating Complex Trauma*, renowned clinicians Mary Jo Barrett and Linda Stone Fish present the Collaborative Change Model (CCM), a clinically evaluated model that facilitates client and practitioner collaboration and provides invaluable tools for clients struggling with the impact and effects of complex trauma. A practical guide, *Treating Complex Trauma* organizes clinical theory, outcome research, and decades of experiential wisdom into a manageable blueprint for treatment. With an emphasis on relationships, the model helps clients move from survival mindstates to engaged mindstates, and as a sequential and organized model, the CCM can be used by helping professionals in a wide array of disciplines and settings. Utilization of the CCM in collaboration with clients and other trauma-informed practitioners helps prevent the re-traumatization of clients and the compassion fatigue of the practitioner so that they can work together to build a hopeful and meaningful vision of the future. 50

Fantastic Ideas for Exploring Food Judit Horvath, 2017-01-12 The 50 Fantastic Ideas series is packed full of fun, original, skills-based activities for Early Years practitioners to use with children aged 0-5. Each activity features step-by-step guidance, a list of resources, and a detailed explanation of the skills children will learn. Creative, simple, and highly effective, this series is a must-have for every Early Years setting. Children have a natural curiosity towards real-life procedures, and being involved in cooking and all of its preparation activities has proven to stimulate young minds throughout history. By preparing simple meals together from scratch, children will naturally develop the love of good, healthy food, whilst it can also tackle the issue of fussy eaters who are far more likely to try something they've prepared themselves.
