Design Solutions for Adaptive

Hypermedia Listening Software Turel, Vehbi, 2021-06-18 Adaptive hypermedia listening software enables materials writers to combine and deliver a wide range of digital elements on the same digital computer platform more efficiently. Such a combination and delivery provides a multidimensional multi-sensory digital environment in which rich, efficient, instant, comprehensible, optimum, and meaningful input and feedback can be presented effectively and efficiently. Moreover, language learners' attention can be drawn to forms and meanings in input. Such aspects correspond with different theories and hypotheses of language learning and teaching. This presents users/learners with an environment that is easy to use, tension-free, and optimal during self-study. However, to be able to design and develop cost-effective and professional adaptive hypermedia listening software, there are certain scientific, educational findings and implications that need to be implemented at every single stage. To have access to such vital findings is not so easy, and research must address this area. **Solutions for Adaptive Hypermedia Listening Software** explores how to design and create technically and pedagogically sound and efficient interactive adaptive hypermedia listening software for language learners in any language. The chapters will cover learner strategy tools, the effectiveness of this technology, best practices in adaptive hypermedia listening software, and the benefits and challenges of this technology for language learning. It is ideal for companies, institutions, teachers, policymakers, academicians, researchers, advanced-level students, technology developers, and decision-makers/pertinent government officials interested in designing and developing multimedia listening environments for language learners.

Space, Place and Autonomy in Language Learning Garold Murray, Terry Lamb, 2017-11-03 This book explores theories of space and place in relation to autonomy in language learning. Encompassing a wide range of linguistically and culturally diverse learning contexts, this edited collection brings together research papers from academics working in fourteen countries. In their studies, these researchers examine physical, virtual, and metaphorical learning spaces from a wide range of theoretical and interdisciplinary perspectives: semiotic, ecological, complexity, human geography, linguistic landscapes, mediated discourse analysis, sociocultural constructivist, and social constructivist and methodological approaches. The book traces its origins to the first ever symposium on space, place, and autonomy, which was held at the International Association of Applied Linguistics (AILA) 2014 World Congress in Brisbane. The final chapter, which presents a thematic analysis of the papers in this volume, discusses the implications for theory development, further enquiry, and pedagogical practice. **The**
